## TA1231F,TA1231FN

## UHF / VHF TUNER IC

The TA1231F and TA1231FN are TV tuner ICs which integrate on a single chip IF amp, a mixer / oscillator for VHF band and cable TV, together with a mixer / oscillator for UHF band. The package is an SSOP16-P-225A ( $1-\mathrm{mm}$ pitch) or SSOP16-P-225B ( $0.65-\mathrm{mm}$ pitch) optimal for surface mounting to help make tuners more compact.

## FEATURES

- Supply voltage
: 9V
- VHF, CATV bands : MIX • OSC
- UHF band
: MIX • OSC
- Built-in IF amp
- IF unbalanced output

Note: These devices are easy to be damaged by high static voltage or electric fields.
In regards to this, please handle with care.

## BLOCK DIAGRAM

## TERMINAL FUNCTION

| PIN No. | PIN NAME | FUNCTION |
| :---: | :--- | :--- | :--- |
| 1 |  |  |
| 16 |  |  |$\quad$ VHF oscillator | VHF oscillator. |
| :--- |
| To prevent abnormal oscillation, |
| connect a resistor between pin 16 and |
| the external capacitor. |

| PIN No. | PIN NAME | FUNCTION | INTERFACE |
| :---: | :---: | :---: | :---: |
| 6 | REG | Regulator output. |  |
| $\begin{aligned} & 7 \\ & 8 \end{aligned}$ | UHF input | UHF • RF input. <br> Either apply balanced input to pins 7 and 8, or ground pin 7 to AC and apply input to pin 8. |  |
| $\begin{gathered} 9 \\ 10 \end{gathered}$ | VHF input | VHF-RF input. <br> Normally ground pin 10 to AC using a capacitor and input to pin 9 . |  |
| 11 | $\mathrm{V}_{\mathrm{CC}}$ | VCC | - |
| 12 | IF output | IF output. Output impedance : $75 \Omega$ |  |
| $\begin{aligned} & 13 \\ & 14 \end{aligned}$ | MIX output | Mixer output. <br> For turning, connect a tank circuit between pins 13 and 14. |  |
| 15 | GND | GND | - |

MAXIMUM RATINGS $\left(\mathbf{T a}=25^{\circ} \mathrm{C}\right)$

| CHARACTERISTIC | SYMBOL | RATING | UNIT |
| :--- | :---: | :---: | :---: |
| Power Supply Voltage | $\mathrm{V}_{\mathrm{CC}}$ | 11 | V |
| Power Dissipation | $\mathrm{P}_{\mathrm{D}}$ | (Note 1) | mW |
| Operating Temperature | $\mathrm{T}_{\mathrm{opr}}$ | $-20 \sim 75$ | ${ }^{\circ} \mathrm{C}$ |
| Storage Temperature | $\mathrm{T}_{\mathrm{stg}}$ | $-55 \sim 150$ | ${ }^{\circ} \mathrm{C}$ |

Note 1: 641 mW for TA1231F
568 mW for TA1231FN
When using the device at above $\mathrm{Ta}=25^{\circ} \mathrm{C}$, decrease the power dissipation F-type by 5.2 mW and FN -type by 4.6 mW for each increase of $1^{\circ} \mathrm{C}$.
The above values are for the IC only. When using the device in an application, take the effect of heat dissipation into consideration.

## RECOMMENDED OPERATING CONDITION

| PIN <br> No. | SYMBOL | MIN | TYP. | MAX | UNIT |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 11 | VCC | 8.1 | 9.0 | 9.9 | V |

|  | UHF : $\mathrm{f}_{\mathrm{RF}}=373.2$ | ~801.25 |  |  |  |  |  |  |  |

## TEST CONDITIONS

Note 1: Conversion Gain Shift
Measure conversion gain change when $\mathrm{VCC} \pm 10 \%$ with input level $=-50 \mathrm{dBmW}, \mathrm{VCC}=9 \mathrm{~V}$ as the reference.
Note 2: Frequency Shift
Measure frequency change when $\mathrm{VCC}_{\mathrm{C}} \pm 10 \%$ with input level $=-40 \mathrm{dBmW}, \mathrm{VCC}_{\mathrm{C}}=9 \mathrm{~V}$ as the reference.
Note 3: Switching On Drift
Measure frequency change up to 3 minutes with the frequency at 2 seconds after switching on, as the reference. (Input level : -30 dBmW )
Note 4: 1\% Cross Modulation

- $\quad \mathrm{fD}=\mathrm{fp} \mathrm{fD}$ : Input level $=-30 \mathrm{dBmW}$
- $\mathrm{fUD}=\mathrm{fD}+12 \mathrm{MHz} \quad 100 \mathrm{kHz}, 30 \% \mathrm{AM}$.

Input the two signals above, and increase the fUD input level.
Measure the fUD input level when the suppression level reaches 56.5 dB .
(Averaging 10 times using a spectrum analyzer.)

Note 5: Inter Modulation

- $\mathrm{fD}=\mathrm{fp}$
- $\quad \mathrm{fUD}=\mathrm{fD}+1 \mathrm{MHz}$

Input the two signals above, and increase the input levels.
When the IF output level is -11 dBmW , measure the suppression level.
(Averaging 10 times using a spectrum analyzer.)

Note 6: 6-ch Beat

- $\quad \mathrm{fp}=83.25 \mathrm{MHz}$ (USA : 6ch)
- $\mathrm{f}_{\mathrm{S}}=87.75 \mathrm{MHz}$ (USA : 6ch)

Input the two signals above, and increase the input levels.
When the IF output level is -11 dBmW , measure the suppression level.
(Averaging 10 times using a spectrum analyzer.)

[^0]:    - TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property.
    In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
    - The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
    - The products described in this document are subject to the foreign exchange and foreign trade laws.
    - The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA CORPORATION for any infringements of intellectual property or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any intellectual property or other rights of TOSHIBA CORPORATION or others.
    - The information contained herein is subject to change without notice.
