

TOSHIBA Bipolar Linear Integrated Circuit Silicon Monolithic

TA2157F, TA2157FN

Digital Servo Head Amp for CD System

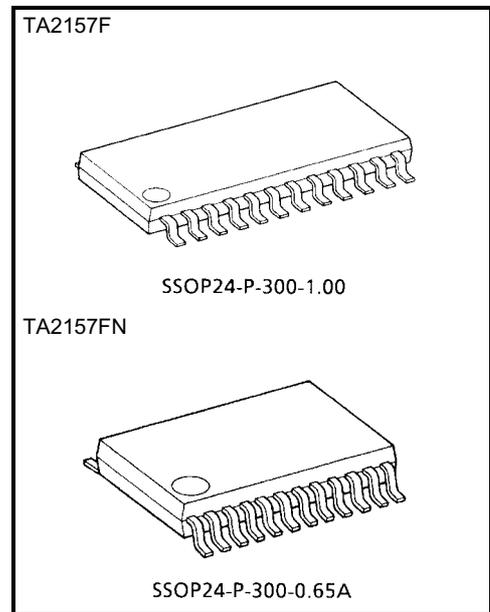

TA2157F/FN is a digital servo head amp for a 3-beam pickup used in CD systems.

Gain for RF signal generation amp can be freely set, supporting CD-RW.

Combining with single-chip processor TC94A14F/FA, a CMOS digital servo, makes configuring CD systems simple.

Features

- Low power dissipation digital servo head amp
- Built-in amplifier for generating reference voltage (VRO)
- Built-in auto laser power control (APC) amplifier
- Built-in RF amplifier
- Built-in RF signal automatic gain control (AGC) amplifier
- Built-in gain change circuit for CD-RW
- Built-in focus error and tracking error signal amplifiers
- Built-in track count signal amplifier
- Normal-, double-, and $\times 4$ -speed operation
- 24-pin mini flat package

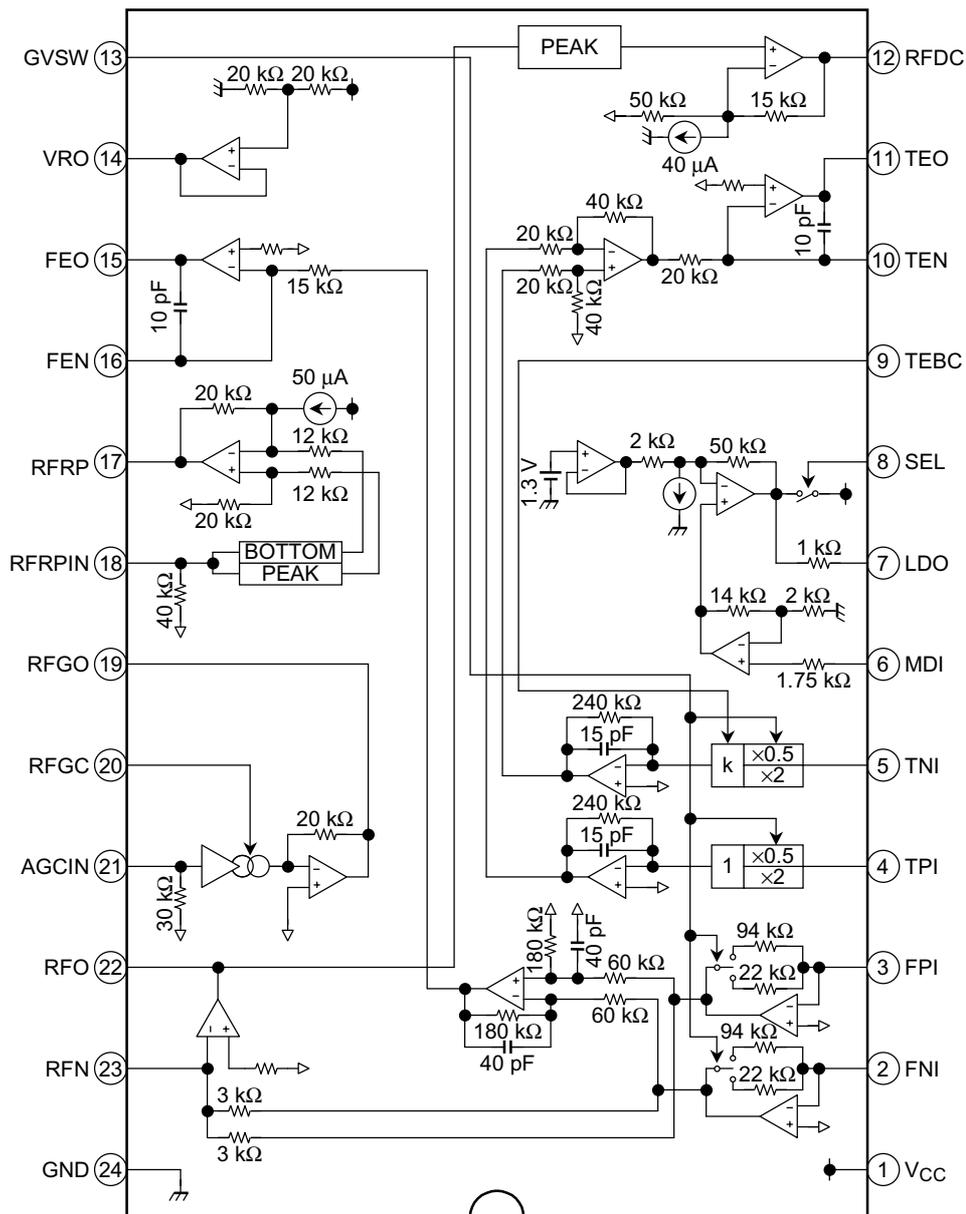

Weight:

SSOP24-P-300-1.00: 0.3 g (typ.)

SSOP24-P-300-0.65A: 0.17 g (typ.)

Note 2: (DA) : Normal mode

Note 3: If the IC is used abnormally (ex, wrongly mounted), it may be damaged or destroyed.

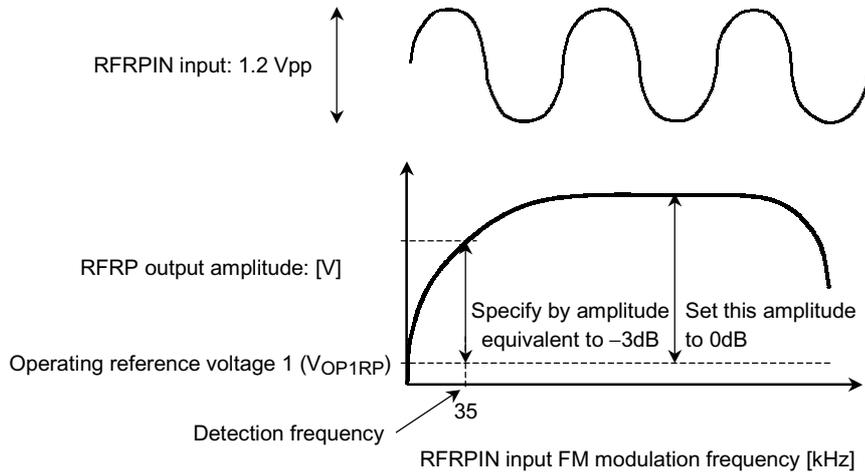

Test Methods (supplementary)

Note: Due to the relation with RFRP detection frequency, use feed search (track cross speed) at 80 kHz or less.

1. Test method for RFRP detection frequency characteristic and detection time constant

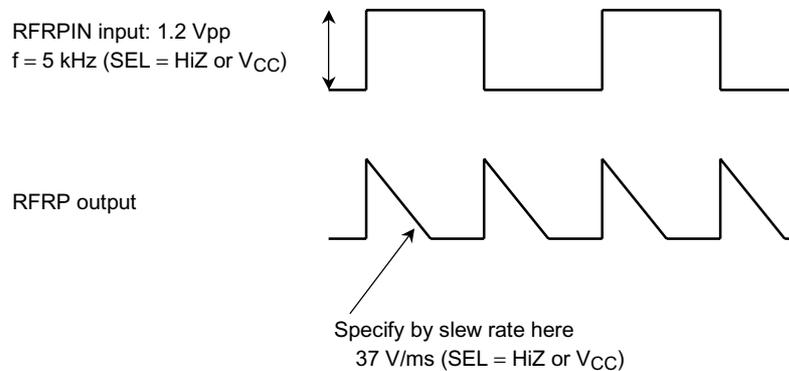

(1) Detection frequency

Set to 0dB the maximum output amplitude of the RFRP pin in relation to the operating reference voltage 1 (V_{OP1RP}) when the sine wave shown in the figure below is input via a capacitor ($C_{in} > 1 \mu F$) to the RFRPIN pin and specify a frequency whose amplitude is $-3dB$.

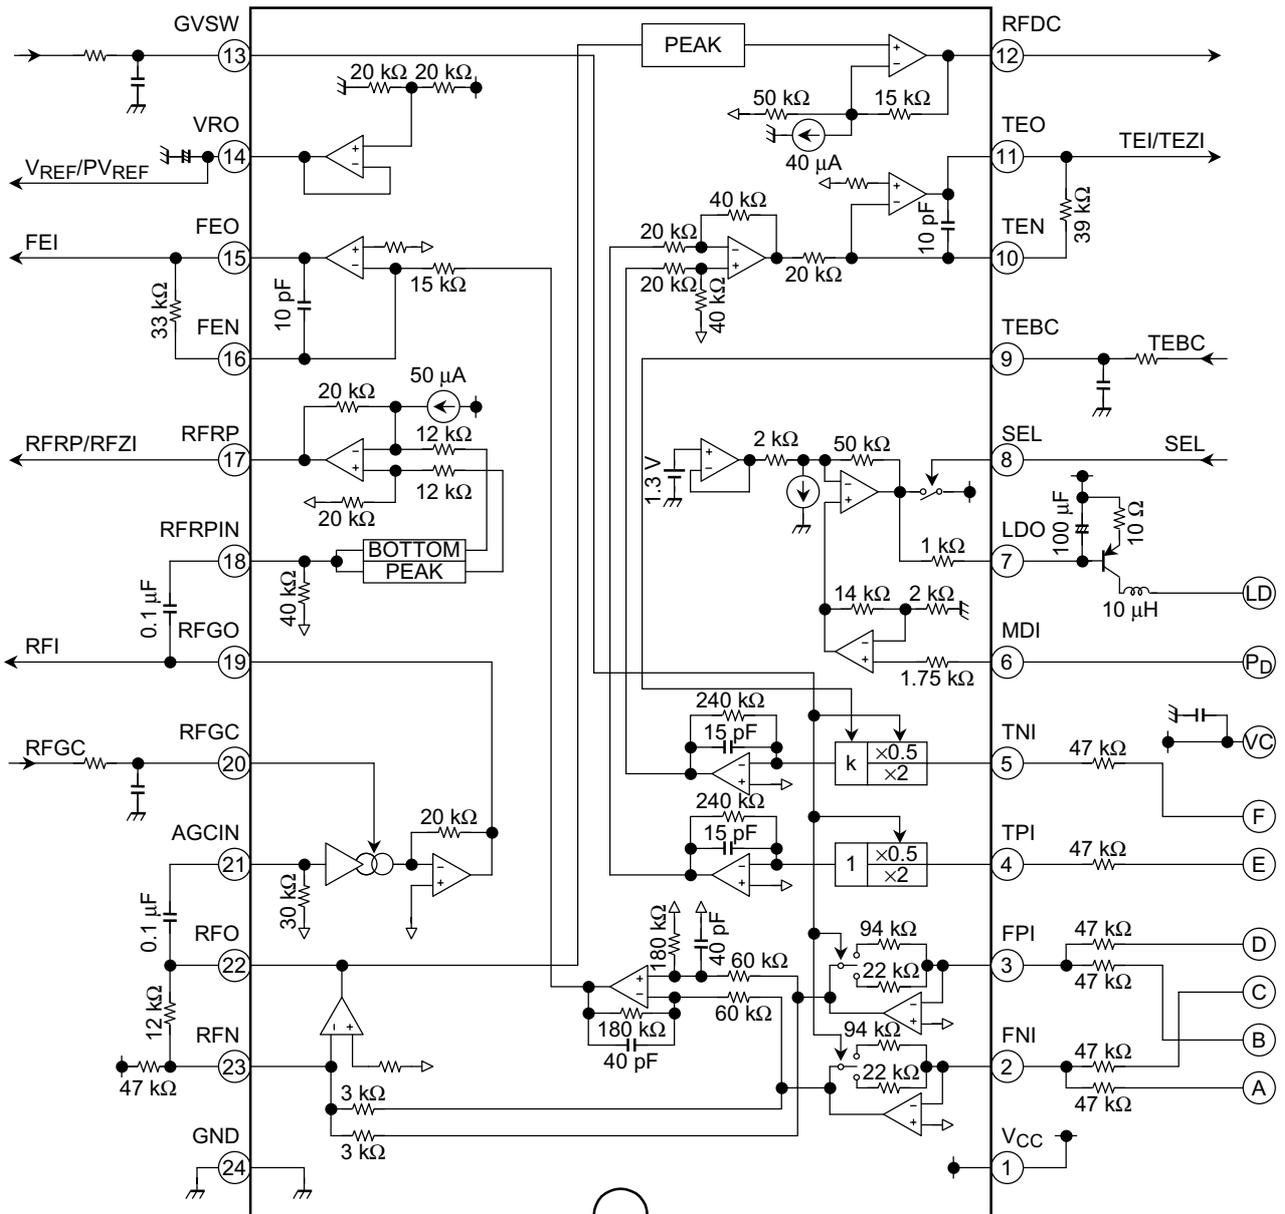

(2) Detection time constant

Specify the time constant for peak and bottom detection frequencies when the square wave shown in the figure below is input via a capacitor ($C_{in} > 1 \mu F$) to the RFRPIN pin at the slew rate of the RFRP pin output sawtooth wave.

- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property.
In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- The products described in this document are subject to the foreign exchange and foreign trade laws.
- The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA CORPORATION for any infringements of intellectual property or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any intellectual property or other rights of TOSHIBA CORPORATION or others.
- The information contained herein is subject to change without notice.
