

TOSHIBA Bipolar Linear Integrated Circuit Silicon Monolithic

TA48L018F, TA48L02F, TA48L025F, TA48L03F, TA48L033F, TA48L05F

1.8 V, 2 V, 2.5 V, 3 V, 3.3 V, 5 V

Three-Terminal Low Dropout Voltage Regulator with Output Current of 0.15 A

The TA48L**F series consists of fixed-positive-output, low-dropout regulators with an output current of 1 A (max) that utilize V-PNP transistors for the output stage. In response to the need for low-voltage and low-power dissipation devices for use in consumer electronics and industrial appliances, the series offers devices with low output voltages: 1.8 V, 2 V, 2.5 V, 3 V, 3.3 V, 5 V.

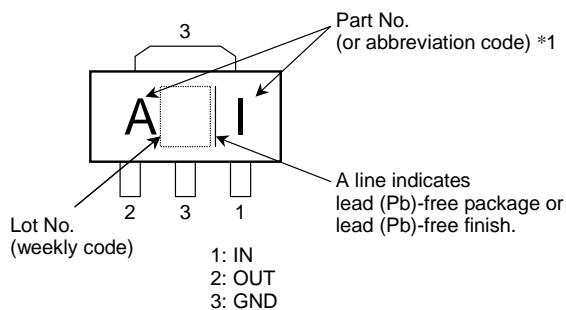

Weight: 0.05 g (typ.)

Features

- Maximum output current: 0.15 A
- Output voltage accuracy: $V_{OUT} \pm 3\% (@T_j = 25^\circ C)$
- Low standby current: 400 μA (typ.) ($@I_{OUT} = 0 A$)
- Low-dropout voltage: $V_D = 0.5 V$ (max) ($@I_{OUT} = 100 mA$)
- Protection function: overheat/overcurrent
- Package type: PW-MINI (SOT-89) package

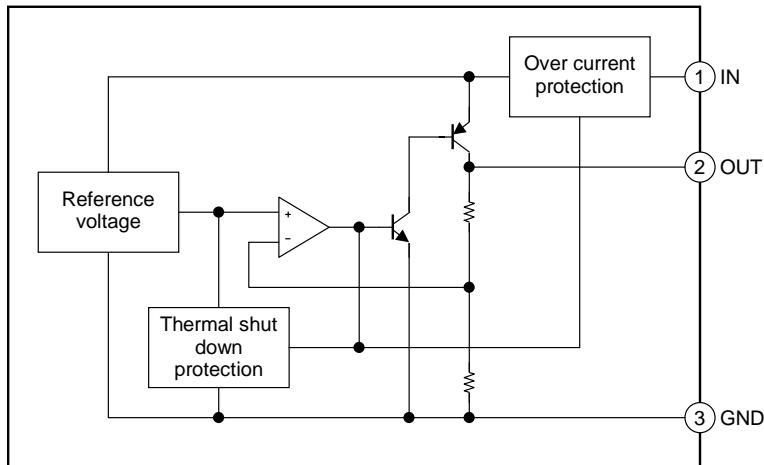

Pin Assignment/Marking

	Part No. (or abbreviation code)	Part No.
*1	AI	TA48L018F
	BI	TA48L02F
	CI	TA48L025F
	DI	TA48L03F
	EI	TA48L033F
	FI	TA48L05F

How to Order

Product No.	Package	Packing Type and Unit for Orders
TA48L**F	PW-MINI (SOT-89) Surface-mount package	On cut tape (TE12L): 100/tape section
TA48L**F (TE12L)		Embossed tape: 1000 pcs/tape

Block Diagram**Maximum Ratings (Ta = 25°C)**

Characteristics	Symbol	Rating	Unit
Input voltage	V _{IN}	16	V
Output current	I _{OUT}	0.15	A
Operating temperature	T _{opr}	-40~85	°C
Junction temperature	T _j	150	°C
Storage temperature	T _{stg}	-55~150	°C
Power dissipation	P _D	0.5	W
Thermal resistance (Junction to ambient)	R _{th(j-a)}	250	°C/W

Note 1: External current and voltage (including negative voltage) should not be applied to pins not specified.

Protection Function (reference)

Characteristics	Symbol	Test Condition	Min	Typ.	Max	Unit
Thermal shutdown	T _{SD} (T _j)	—	—	160	—	°C
Peak circuit current	I _{PEAK}	V _{IN} = V _{OUT} + 2 V, T _j = 25°C	—	0.27	—	A
Short circuit current	I _{SC}	V _{IN} = V _{OUT} + 2 V, T _j = 25°C	—	0.27	—	A

Note 2: Note 2: The maximum ratings should not be exceeded when the IC is actually used.

TA48L018F

Electrical Characteristics

(C_{IN} = 0.33 µF, C_{OUT} = 3.3 µF, T_j = 25°C, unless otherwise specified)

Characteristics	Symbol	Test Conditions	Min	Typ.	Max	Unit

Electrical Characteristics for All Products

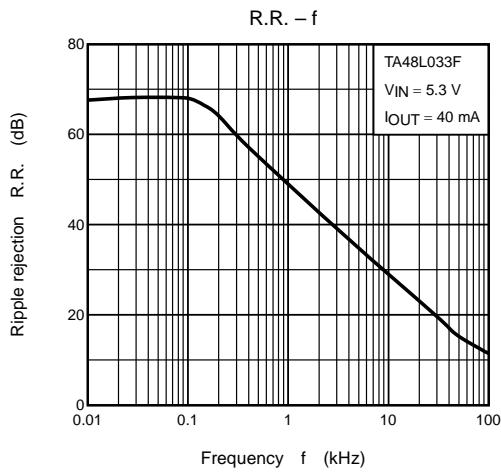

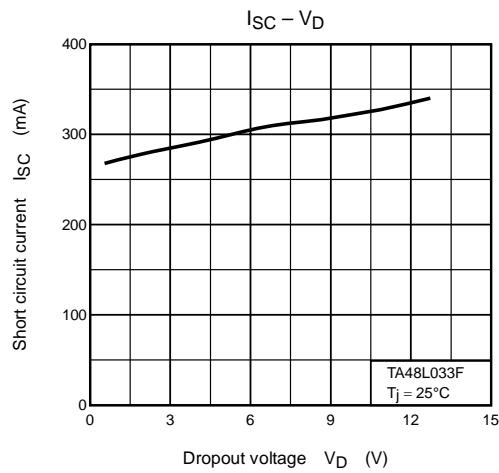

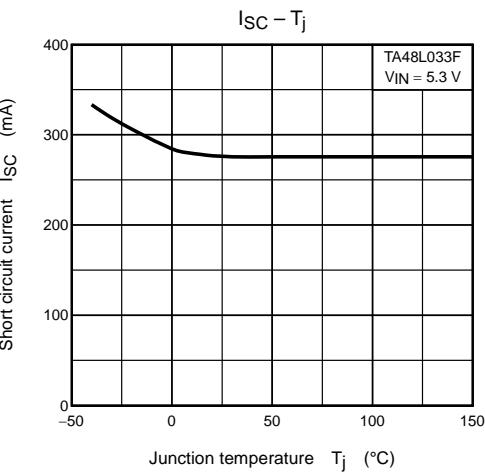

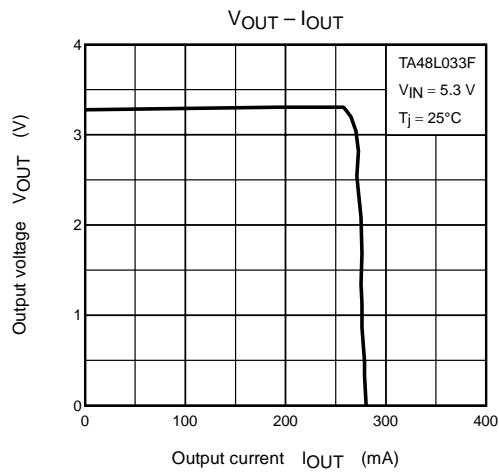

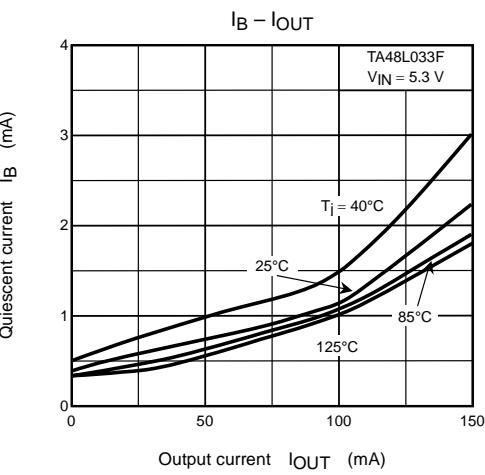

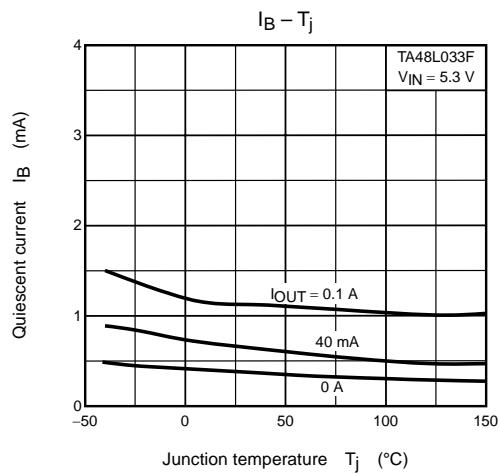

Generally, the characteristics of power supply ICs change according to temperature fluctuations. The specification $T_j = 25^\circ\text{C}$ is based on a state where temperature increase has no effect (assuming no fluctuation in the characteristics) as ascertained by pulse tests.

Standard Application Circuit

Be sure to connect a capacitor near the input terminal and output terminal between both terminals and GND. The capacitances should be determined experimentally. In particular, adequate investigation should be made so that there is no problem even in high or low temperatures.

RESTRICTIONS ON PRODUCT USE

030619EBA

- The information contained herein is subject to change without notice.
- The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA for any infringements of patents or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any patent or patent rights of TOSHIBA or others.
- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property.
In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- The products described in this document are subject to the foreign exchange and foreign trade laws.
- TOSHIBA products should not be embedded to the downstream products which are prohibited to be produced and sold, under any law and regulations.
