

**Ultra Low Noise pHEMT Dual
Channel Amplifier, 1.710-1.910 GHz**

**AM40-0023
V3**

Features

- 0.7 dB Typical Noise Figure
- 14 dB Typical Gain
- DC Decoupled RF Input and Output
- Single Bias Configuration
- SMT Construction
- Dual Channels for Balanced Designs
- Unconditionally Stable—No External Matching Circuit required

Description

M/A-COM's AM40-0023 is a dual-channel, ultra low noise amplifier in a surface mount package. Very low noise figure is achieved by using discrete pHEMT devices combined with M/A-COM's glass technology. The AM40-0023 is designed specifically for use in DCS-1800 and PCS telecommunication applications where less than 1 dB noise figure is required.
