

DC-DC step down power supply

Preliminary Data

Features

- Module DC-DC step down single output
- Wide range input voltage 100÷370 V_{dc}
- Output power 4.0 W Typ
- Output voltage precision 5%
- Output short circuit protection
- No heatsink required
- Not - latching overload and short circuit protection
- MTBF > 1.000.000 hours (T_A = 25°C)
- Incapsulated or open frame packages
- Pins or comb insertion
- RoHS compliant

Description

The DC-DC module is a high efficiency DC-DC not insulated switch mode constant voltage generator.

Designed for industrial application where low voltages are required from main.

Step down converter performs a typ 4.0 W power conversion.

The output voltages and current level are set up by design in accordance with customer requirements.

Typical reference values for the shelf solution are:

- Single output -12 V, ±5%, 0.35 A.

BT = Encapsulated through hole

FT = Open frame through hole

FC = Open Frame

- Agency approvals
The safety and EMI compliance has to be assured by the user.

3 Mechanical dimensions

In order to meet environmental requirements, ST offers these devices in ECOPACK® packages. These packages have a Lead-free second level interconnect. The category of second level interconnect is marked on the package and on the inner box label, in compliance with JEDEC Standard JESD97. The maximum ratings related to soldering conditions are also marked on the inner box label. ECOPACK is an ST trademark. ECOPACK specifications are available at: www.st.com
