

PICDEM™ CAN-LIN 1, 2 and 3 Demonstration Boards

Summary

Microchip offers three similar PICDEM CAN-LIN demonstration boards to support different PIC® microcontroller devices. All demonstrate the main features of the devices, especially those features of the integrated CAN module. In addition to the CAN network, the board also employs a LIN sub-network using Microchip's PIC16C43X and PIC18F1320 device families.

Each PICDEM CAN-LIN demonstration board includes both firmware and PC software for simulating a CAN network. The firmware comes pre-programmed on the sample device. The PC software and documentation are furnished on a CD ROM.
