74HC4052; 74HCT4052

Dual 4-channel analog multiplexer/demultiplexer Rev. 10 — 19 July 2012 Pro

Product data sheet

General description 1.

The 74HC4052; 74HCT4052 is a high-speed Si-gate CMOS device and is pin compatible with the HEF4052B. The device is specified in compliance with JEDEC standard no. 7A.

The 74HC4052; 74HCT4052 is a dual 4-channel analog multiplexer/demultiplexer with common select logic. Each multiplexer has four independent inputs/outputs (pins nY0 to nY3) and a common input/output (pin nZ). The common channel select logics include two digital select inputs (pins S0 and S1) and an active LOW enable input (pin E). When pin E = LOW, one of the four switches is selected (low-impedance ON-state) with pins S0 and S1. When pin E = HIGH, all switches are in the high-impedance OFF-state, independent of pins S0 and S1.

V_{CC} and GND are the supply voltage pins for the digital control inputs (pins S0, S1 and E). The V_{CC} to GND ranges are 2.0 V to 10.0 V for the 74HC4052 and 4.5 V to 5.5 V for the 74HCT4052. The analog inputs/outputs (pins nY0 to nY3 and nZ) can swing between V_{CC} as a positive limit and V_{EE} as a negative limit. $V_{CC} - V_{EE}$ may not exceed 10.0 V.

For operation as a digital multiplexer/demultiplexer, V_{EE} is connected to GND (typically ground).

Features and benefits 2.

- Wide analog input voltage range from -5 V to +5 V
- Low ON resistance:
 - 80 Ω (typical) at $V_{CC} V_{EE} = 4.5 \text{ V}$
 - 70 Ω (typical) at V_{CC} − V_{EE} = 6.0 V
 - 60 Ω (typical) at $V_{CC} V_{EE} = 9.0 \text{ V}$
- Logic level translation: to enable 5 V logic to communicate with ±5 V analog signals
- Typical 'break before make' built-in
- Complies with JEDEC standard no. 7A
- ESD protection:
 - HBM JESD22-A114F exceeds 2000 V
 - MM JESD22-A115-A exceeds 200 V
 - CDM JESD22-C101E exceeds 1000 V
- Specified from -40 °C to +85 °C and -40 °C to +125 °C

3. Applications

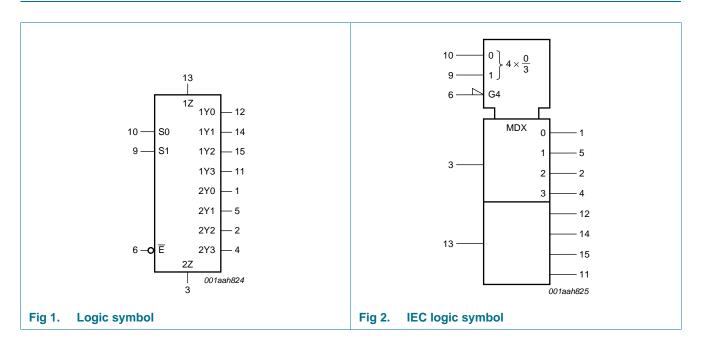

- Analog multiplexing and demultiplexing
- Digital multiplexing and demultiplexing
- Signal gating

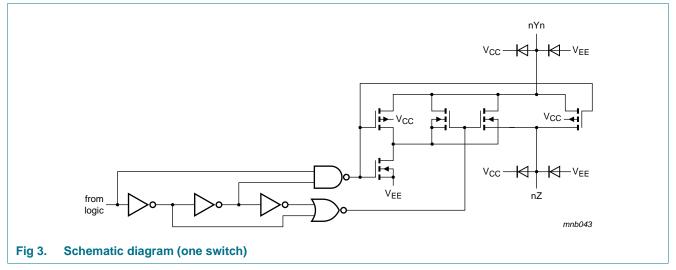

4. Ordering information

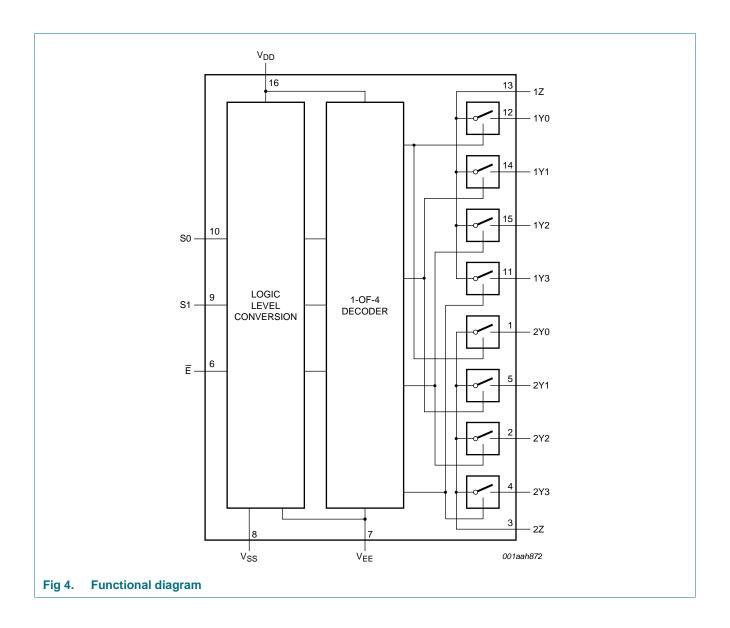

Table 1. Ordering information

Type number	Package							
	Temperature range	Name	Description	Version				
74HC4052								
74HC4052N	–40 °C to +125 °C	DIP16	plastic dual in-line package; 16 leads (300 mil)	SOT38-4				
74HC4052D	–40 °C to +125 °C	SO16	plastic small outline package; 16 leads; body width 3.9 mm	SOT109-1				
74HC4052DB	–40 °C to +125 °C	SSOP16	plastic shrink small outline package; 16 leads; body width 5.3 mm	SOT338-1				
74HC4052PW	–40 °C to +125 °C	TSSOP16	plastic thin shrink small outline package; 16 leads; body width 4.4 mm	SOT403-1				
74HC4052BQ	–40 °C to +125 °C	DHVQFN16	plastic dual-in line compatible thermal enhanced very thin quad flat package; no leads; 16 terminals; body $2.5\times3.5\times0.85$ mm	SOT763-1				
74HCT4052								
74HCT4052N	–40 °C to +125 °C	DIP16	plastic dual in-line package; 16 leads (300 mil)	SOT38-4				
74HCT4052D	–40 °C to +125 °C	SO16	plastic small outline package; 16 leads; body width 3.9 mm	SOT109-1

6.1 Pinning

6.2 Pin description

Table 2. Pin description

Symbol	Pin	Description
2Y0	1	independent input or output 2Y0
2Y2	2	independent input or output 2Y2
2Z	3	common input or output 2
2Y3	4	independent input or output 2Y3
2Y1	5	independent input or output 2Y1
Ē	6	enable input (active LOW)
V _{EE}	7	negative supply voltage
GND	8	ground (0 V)
S1	9	select logic input 1
S0	10	select logic input 0
1Y3	11	independent input or output 1Y3
1Y0	12	independent input or output 1Y0
1Z	13	common input or output 1
1Y1	14	independent input or output 1Y1
1Y2	15	independent input or output 1Y2
V _{CC}	16	positive supply voltage

7. Functional description

7.1 Function table

Table 3. Function table [1]

Input			Channel on
Ē	S1	S0	
L	L	L	nY0 and nZ
L	L	Н	nY1 and nZ
L	Н	L	nY2 and nZ
L	Н	Н	nY3 and nZ
Н	X	X	none

^[1] H = HIGH voltage level;

L = LOW voltage level;

8. Limiting values

Table 4. Limiting values

In accordance with the Absolute Maximum Rating System (IEC 60134). Voltages are referenced to $V_{EE} = \text{GND}$ (ground = 0 V).

Symbol	Parameter	Conditions	Min	Max	Unit
V_{CC}	supply voltage		<u>[1]</u> –0.5	+11.0	V
I _{IK}	input clamping current	$V_I < -0.5 \text{ V or } V_I > V_{CC} + 0.5 \text{ V}$	-	±20	mA
I _{SK}	switch clamping current	V_{SW} < -0.5 V or V_{SW} > V_{CC} + 0.5 V	-	±20	mA
I _{SW}	switch current	$-0.5 \text{ V} < \text{V}_{\text{SW}} < \text{V}_{\text{CC}} + 0.5 \text{ V}$	-	±25	mA
I _{EE}	supply current		-	±20	mA
I _{CC}	supply current		-	50	mA
I _{GND}	ground current		-	-50	mA
T _{stg}	storage temperature		-65	+150	°C
P _{tot}	total power dissipation	DIP16 package	[2] _	750	mW
		SO16, (T)SSOP16, and DHVQFN16 package	[3]	500	mW
Р	power dissipation	per switch	-	100	mW

^[1] To avoid drawing V_{CC} current out of pins nZ, when switch current flows in pins nYn, the voltage drop across the bidirectional switch must not exceed 0.4 V. If the switch current flows into pins nZ, no V_{CC} current will flow out of pins nYn. In this case there is no limit for the voltage drop across the switch, but the voltages at pins nYn and nZ may not exceed V_{CC} or V_{EE} .

X = don't care.

^[2] For DIP16 packages: above 70 $^{\circ}$ C the value of P_{tot} derates linearly with 12 mW/K.

^[3] For SO16 packages: above 70 °C the value of P_{tot} derates linearly with 8 mW/K.
For SSOP16 and TSSOP16 packages: above 60 °C the value of P_{tot} derates linearly with 5.5 mW/K.
For DHVQFN16 packages: above 60 °C the value of P_{tot} derates linearly with 4.5 mW/K.

9. Recommended operating conditions

Table 5. Recommended operating conditions

Table 6. R_{ON} resistance per switch for 74HC4052 and 74HCT4052 ...continued

 $V_I = V_{IH}$ or V_{IL} ; for test circuit see <u>Figure 9</u>.

 V_{is} is the input voltage at a nYn or nZ terminal, whichever is assigned as an input.

Vos is the output voltage at a nYn or nZ terminal, whichever is assigned as an output.

For 74HC4052: V_{CC} – GND or V_{CC} – V_{EE} = 2.0 V, 4.5 V, 6.0 V and 9.0 V.

For 74HCT4052: V_{CC} – GND = 4.5 V and 5.5 V, V_{CC} – V_{EE} = 2.0 V, 4.5 V, 6.0 V and 9.0 V.

Symbol	Parameter	Conditions	Min	Тур	Max	Unit
R _{ON(rail)}	ON resistance (rail)	$V_{is} = V_{EE}$				
		V_{CC} = 2.0 V; V_{EE} = 0 V; I_{SW} = 100 μA	[2] _	-	-	Ω
		V_{CC} = 4.5 V; V_{EE} = 0 V; I_{SW} = 1000 μA	-	-	210	Ω
		V_{CC} = 6.0 V; V_{EE} = 0 V; I_{SW} = 1000 μA	-	-	180	Ω
		V_{CC} = 4.5 V; V_{EE} = -4.5 V; I_{SW} = 1000 μA	-	-	160	Ω
		$V_{is} = V_{CC}$				
		V_{CC} = 2.0 V; V_{EE} = 0 V; I_{SW} = 100 μA	[2]	-	-	Ω
		V_{CC} = 4.5 V; V_{EE} = 0 V; I_{SW} = 1000 μA	-	-	240	Ω
		V_{CC} = 6.0 V; V_{EE} = 0 V; I_{SW} = 1000 μA	-	-	210	Ω
		V_{CC} = 4.5 V; V_{EE} = -4.5 V; I_{SW} = 1000 μA	-	-	180	Ω

- [1] All typical values are measured at T_{amb} = 25 °C.
- [2] When supply voltages (V_{CC} V_{EE}) near 2.0 V the analog switch ON resistance becomes extremely non-linear. When using a supply of 2 V, it is recommended to use these devices only for transmitting digital signals.

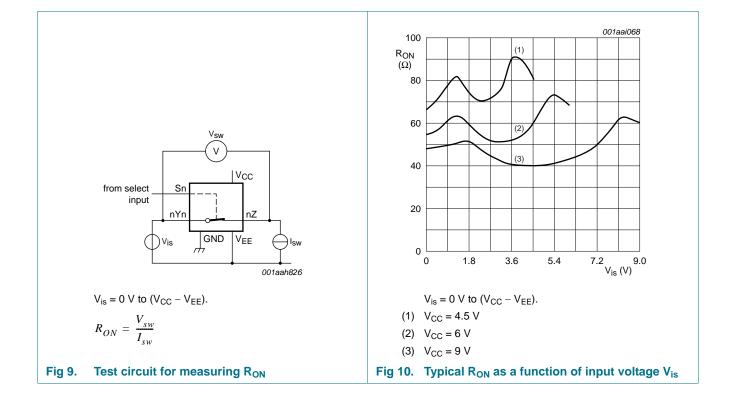

Table 7. Static characteristics for 74HC4052

Voltages are referenced to GND (ground = 0 V).

 V_{is} is the input voltage at pins nYn or nZ, whichever is assigned as an input.

Vos is the output voltage at pins nZ or nYn, whichever is assigned as an output.

Table 9. Dynamic characteristics for 74HC4052

GND = 0 V; $t_f = t_f = 6$ ns; $C_L = 50$ pF; for test circuit see <u>Figure 15</u>.

V_{is} is the input voltage at a nYn or nZ terminal, whichever is assigned as an input.

 V_{os} is the output voltage at a nYn or nZ terminal, whichever is assigned as an output.

- [2] The term 'short data sheet' is explained in section "Definitions"
- [3] The product status of device(s) described in this document may have changed since this document was published and may differ in case of multiple devices. The latest product status information is available on the Internet at URL http://www.nxp.com.

16.2 Definitions

Draft — The document is a draft version only. The content is still under internal review and subject to formal approval, which may result in modifications or additions. NXP Semiconductors does not give any representations or warranties as to the accuracy or completeness of information included herein and shall have no liability for the consequences of use of such information.

Short data sheet — A short data sheet is an extract from a full data sheet with the same product type number(s) and title. A short data sheet is intended for quick reference only and should not be relied upon to contain detailed and full information. For detailed and full information see the relevant full data sheet, which is available on request via the local NXP Semiconductors sales office. In case of any inconsistency or conflict with the short data sheet, the full data sheet shall prevail.

Product specification — The information and data provided in a Product data sheet shall define the specification of the product as agreed between NXP Semiconductors and its customer, unless NXP Semiconductors and customer have explicitly agreed otherwise in writing. In no event however, shall an agreement be valid in which the NXP Semiconductors product is deemed to offer functions and qualities beyond those described in the Product data sheet.

16.3 Disclaimers

Limited warranty and liability — Information in this document is believed to be accurate and reliable. However, NXP Semiconductors does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information and shall have no liability for the consequences of use of such information. NXP Semiconductors takes no responsibility for the content in this document if provided by an information source outside of NXP Semiconductors.

In no event shall NXP Semiconductors be liable for any indirect, incidental, punitive, special or consequential damages (including - without limitation - lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) whether or not such damages are based on tort (including negligence), warranty, breach of contract or any other legal theory.

Notwithstanding any damages that customer might incur for any reason whatsoever, NXP Semiconductors' aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the *Terms and conditions of commercial sale* of NXP Semiconductors.

Right to make changes — NXP Semiconductors reserves the right to make changes to information published in this document, including without limitation specifications and product descriptions, at any time and without notice. This document supersedes and replaces all information supplied prior to the publication hereof.

Suitability for use — NXP Semiconductors products are not designed, authorized or warranted to be suitable for use in life support, life-critical or safety-critical systems or equipment, nor in applications where failure or malfunction of an NXP Semiconductors product can reasonably be expected to result in personal injury, death or severe property or environmental damage. NXP Semiconductors and its suppliers accept no liability for inclusion and/or use of NXP Semiconductors products in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk

Applications — Applications that are described herein for any of these products are for illustrative purposes only. NXP Semiconductors makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

Customers are responsible for the design and operation of their applications and products using NXP Semiconductors products, and NXP Semiconductors accepts no liability for any assistance with applications or customer product design. It is customer's sole responsibility to determine whether the NXP Semiconductors product is suitable and fit for the customer's applications and products planned, as well as for the planned application and use of customer's third party customer(s). Customers should provide appropriate design and operating safeguards to minimize the risks associated with their applications and products.

NXP Semiconductors does not accept any liability related to any default, damage, costs or problem which is based on any weakness or default in the customer's applications or products, or the application or use by customer's third party customer(s). Customer is responsible for doing all necessary testing for the customer's applications and products using NXP Semiconductors products in order to avoid a default of the applications and the products or of the application or use by customer's third party customer(s). NXP does not accept any liability in this respect.

Limiting values — Stress above one or more limiting values (as defined in the Absolute Maximum Ratings System of IEC 60134) will cause permanent damage to the device. Limiting values are stress ratings only and (proper) operation of the device at these or any other conditions above those given in the Recommended operating conditions section (if present) or the Characteristics sections of this document is not warranted. Constant or repeated exposure to limiting values will permanently and irreversibly affect the quality and reliability of the device.

Terms and conditions of commercial sale — NXP Semiconductors products are sold subject to the general terms and conditions of commercial sale, as published at http://www.nxp.com/profile/terms, unless otherwise agreed in a valid written individual agreement. In case an individual agreement is concluded only the terms and conditions of the respective agreement shall apply. NXP Semiconductors hereby expressly objects to applying the customer's general terms and conditions with regard to the purchase of NXP Semiconductors products by customer.

No offer to sell or license — Nothing in this document may be interpreted or construed as an offer to sell products that is open for acceptance or the grant, conveyance or implication of any license under any copyrights, patents or other industrial or intellectual property rights.

74HC4052; 74HCT4052

Dual 4-channel analog multiplexer/demultiplexer

Export control — This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from competent authorities.

Non-automotive qualified products — Unless this data sheet expressly states that this specific NXP Semiconductors product is automotive qualified, the product is not suitable for automotive use. It is neither qualified nor tested in accordance with automotive testing or application requirements. NXP Semiconductors accepts no liability for inclusion and/or use of non-automotive qualified products in automotive equipment or applications.

In the event that customer uses the product for design-in and use in automotive applications to automotive specifications and standards, customer (a) shall use the product without NXP Semiconductors' warranty of the product for such automotive applications, use and specifications, and (b) whenever customer uses the product for automotive applications beyond

NXP Semiconductors' specifications such use shall be solely at customer's own risk, and (c) customer fully indemnifies NXP Semiconductors for any liability, damages or failed product claims resulting from customer design and use of the product for automotive applications beyond NXP Semiconductors' standard warranty and NXP Semiconductors' product specifications.

Translations — A non-English (translated) version of a document is for reference only. The English version shall prevail in case of any discrepancy between the translated and English versions.
