## Non-Linear Output Current, Low Power Ambient Light Photo Detect IC

The ISL29009 is a light-to-current silicon optical sensor combining a photodiode and current amplifiers on a single monolithic IC. Similar to human eyes, the photodiode has peak sensitivity at 550 nm and spans from 400 nm to 700 nm , rejecting UV light and IR light. The input luminance range is from 0.3 lux to 10,000 lux.

The integrated non-linear current amplifier boosts and converts the photodiode signal in a square root fashion, extending the light input dynamic range while maintaining excellent sensitivity at dim conditions with low lux levels. The device consumes minimal power over a wide range of ambient lux levels because the current consumption ramps at a square root fashion. A dark current compensation circuit aids the photodiode to minimize temperature dependent leakage currents in the absence of light, improving the light sensitivity at low lux levels.
In addition, the ISL29009 has an $\overline{\mathrm{EN}}$ pin that can be used for a polling scheme extending portables' battery life.

The ISL29009 is housed in an ultra compact $2 \mathrm{~mm} \times 2.1 \mathrm{~mm}$ ODFN plastic case surface mount package. Operation is rated from $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$.

## Simplified Block Diagram

## Ordering Information

| PART <br> NUMBER <br> (Note) | TEMP. <br> RANGE ( $\left.{ }^{\circ} \mathrm{C}\right)$ | PACKAGE <br> (Pb-free) | PKG. DWG. \# |
| :---: | :---: | :---: | :--- |
| ISL29009IROZ-T7* | -40 to +85 | 6 Ld ODFN | L6.2×2.1 |

*Please refer to TB347 for details on reel specifications.
NOTE: These Intersil Pb-free plastic packaged products employ special Pb -free material sets; molding compounds/die attach materials and NiPdAu plate - e4 termination finish, which is RoHS compliant and compatible with both SnPb and Pb -free soldering operations. Intersil Pb-free products are MSL classified at Pb-free peak reflow temperatures that meet or exceed the Pb -free requirements of IPC/JEDEC J STD-020.

## Features

- Non-linear current output
- 0.3 lux to 10,000 lux range
- Dark current compensation
- Temperature compensated
- Human eye response
- 1.8 V to 3.3 V supply range
- Low supply current
- Fast response time
- 6 Ld ODFN: $2 m m \times 2.1 \mathrm{mmx0.7mm}$
- Pb-free (RoHS compliant)

## Applications

- Display and keypad dimming for:
- Mobile devices: smart phone, PDA, GPS
- Computing devices: notebook PC, webpod
- Consumer devices: LCD-TV, digital picture frame, digital camera
- Industrial and medical light sensing

## Pinout

*THERMAL PAD CAN BE CONNECTED TO GND OR ELECTRICALLY ISOLATED

## Pin Descriptions

| PIN NUMBER | PIN NAME | DESCRIPTION |
| :---: | :---: | :--- |
| 1 | VDD | Supply, 1.8V to 3.3V |
| 2 | GND | Ground |
| 3 | NC | No connect |
| 4 | $\overline{\mathrm{EN}}$ | Active LO enable |
| 5 | NC | No connect |
| 6 | IOUT | Current output |

| Absolute Maximum Ratings ( $\mathrm{T}_{\mathrm{A}}=+25^{\circ} \mathrm{C}$ ) |  |
| :---: | :---: |
| Supply Voltage between VDD and GND | 3.6V |
| Pin Voltage (IOUT and EN) | -0.2 V to $\mathrm{V}_{\mathrm{DD}}$ |
| Maximum Continuous Output Current | 6 mA |
| Operating Temperature | $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ |
| ESD Rating |  |
| Human Body Model | 2kV |
| Machine Model. | 200V |

## Thermal Information

| Thermal Resistance | $\theta_{\mathrm{JA}}\left({ }^{\circ} \mathrm{C} / \mathrm{W}\right)$ |
| :---: | :---: |
| 6 Ld ODFN | 90 |
| Maximum Die Temperature | $+90^{\circ} \mathrm{C}$ |
| Storage Temperature | $-40^{\circ} \mathrm{C}$ to $+100^{\circ} \mathrm{C}$ |
| Operating Temperature | $-40^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}$ |
| Pb-free reflow profile . . . http://www.intersil.com/d | see link below |

CAUTION: Do not operate at or near the maximum ratings listed for extended periods of time. Exposure to such conditions may adversely impact product reliability and result in failures not covered by warranty

IMPORTANT NOTE: All parameters having Min/Max specifications are guaranteed. Typical values are for information purposes only. Unless otherwise noted, all tests are at the specified temperature and are pulsed tests, therefore: $T_{J}=T_{C}=T_{A}$

Electrical Specifications $\quad V_{D D}=3 V, T_{A}=+25^{\circ} C, \overline{E N}=0, R_{L}=100 k \Omega$ at IOUT pin, green LED light, unless otherwise specified.

| PARAMETER | DESCRIPTION | CONDITION | MIN | TYP | MAX | UNIT |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| E | Range of Input Light Intensity |  |  | 0.3 to 10k |  | lux |

## Application Information

## Light-to-Current and Voltage Conversion

The ISL29009 has responsiveness that is a square-root function of the light intensity intercepted by the photodiode in lux. Because the photodiode has a responsivity that resembles the human eye, conversion rate is independent of the light source (fluorescent light, incandescent light or direct sunlight).
$\mathrm{I}_{\text {OUT }}=\frac{1.8 \mu \mathrm{~A}}{\sqrt{100 \mathrm{lux}}} \sqrt{\mathrm{E}}$
Here, $\mathrm{I}_{\mathrm{OUT}}$ is the output current in $\mu \mathrm{A}$, and E is the input light in lux.

A load resistor $R_{L}$ is added to convert lout into $V_{\text {OUT }}$. The output voltage can be expressed in Equation 2:
$V_{\text {OUT }}=I_{\text {OUT }} \times R_{L}=\frac{1.8 \mu \mathrm{~A}}{\sqrt{100 \text { lux }}} \sqrt{E} \times R_{L}$

Here, $\mathrm{V}_{\text {OUT }}$ is the output voltage and $R_{\mathrm{L}}$ is the value of the load resistor added. The compliance of the ISL29009's output circuit may result in premature saturation of the output current and voltage when an excessively large $\mathrm{R}_{\mathrm{L}}$ is used. The output compliance voltage is 200 mV below the supply voltage as listed in $\mathrm{V}_{\mathrm{O}-\mathrm{MAX}}$ of the "Electrical Specifications" table on page 2.

## Optical Sensor Location Outline

The green area in Figure 18 shows the optical sensor location outline of ISL29009. Along the pin-out direction, the center line (CL) of the sensor coincides with that of the packaging. The sensor width in this direction is 0.39 mm . Perpendicular to the pin-out direction, the CL of the sensor has an 0.19 mm offset from the CL of packaging away from pin-1. The sensor width in this direction is 0.46 mm .

## Package Outline Drawing

## L6.2x2.1

6 LEAD OPTICAL DUAL FLAT NO-LEAD PLASTIC PACKAGE (ODFN)
Rev 0, 9/06

NOTES:

1. Dimensions are in millimeters.

Dimensions in ( ) for Reference Only.
2. Dimensioning and tolerancing conform to AMSE Y14.5m-1994.
3. Unless otherwise specified, tolerance : Decimal $\pm 0.05$
4. Dimension $b$ applies to the metallized terminal and is measured between 0.15 mm and 0.30 mm from the terminal tip.
5. Tiebar shown (if present) is a non-functional feature.
6. The configuration of the pin \#1 identifier is optional, but must be located within the zone indicated. The pin \#1 identifier may be either a mold or mark feature.
