THERMOFIT® ADHESIVE AND SEALANT THERMOFIT S-1124

Thermofit S-1124 is a flexible adhesive based on elastomeric polymers. This adhesive was developed for use with Thermofit heat-shrinkable products, NT, NT-FR, and Elastomeric Polymer Blend (EPB). This adhesive provides good bonds of the heat-shrinkable materials to metals, such as steel and aluminum when bond line is heat to 150 °C (302 °F). The adhesive is supplied as a tape in .75 inch by .018 inch by 100 foot rolls, unless otherwise specified.
