

Low Power HDMI/DVI Transmitter

ADV7525

FEATURES

General

Low power HDMI/DVI transmitter ideal for portable applications

CEC controller and expanded message buffer (3 messages) reduce system overhead

HDMI v.1.4a features supported

3D video

Extended colorimetry

Compatible with DVI v.1.0

Optional embedded HDCP keys to support HDCP 1.3

1.8 V supplies for ultralow operating power

Video/audio inputs accept logic levels from 1.8 V to 3.3 V

Digital video

80 MHz operation supports all video and graphics resolutions from 480i to 1080i

Programmable 2-way color space converter

Supports RGB, YCbCr, DDR

Supports ITU656-based embedded syncs

Automatic input video format timing detection (CEA-861E) Digital audio

Supports standard SPDIF for stereo LPCM or compressed audio up to 192 kHz

8-channel uncompressed LPCM I²S audio up to 192 kHz Special features for easy system design

On-chip MPU with I²C master to perform EDID reading and HDCP operations; reports HDMI events through interrupts and registers

5 V tolerant I²C and HPD I/Os, no extra device needed No audio master clock needed for supporting SPDIF and I²S

Compatible with AD9394 HDMI companion chip 5 V generator for Hot Plug detect in portable applications

APPLICATIONS

Cellular handsets
Digital video cameras
Digital still cameras
Personal media players
Gaming
DVD players and recorders
Digital set-top boxes
HDMI repeater

FUNCTIONAL BLOCK DIAGRAM

GENERAL DESCRIPTION

The ADV7525 is an 80 MHz, high definition multimedia interface (HDMI*) transmitter with expanded CEC buffer. It supports HDTV formats up to 1080i and computer graphic resolutions up to XGA at 75 Hz.

With the inclusion of embedded HDCP keys, the ADV7525 allows the secure transmission of protected content, as specified by the HDCP 1.3 protocol.

The ADV7525 supports both SPDIF and 8-channel I²S audio. Its high fidelity 8-channel I²S can transmit stereo up to a 192 kHz sampling rate. The SPDIF can carry stereo LPCM audio or compressed audio, including Dolby* Digital and DTS*.

The ADV7525 helps to reduce system design complexity and cost by incorporating such features as an I²C master for EDID reading and 5 V tolerance on the I²C and Hot Plug[™] detect pins.

Fabricated in an advanced CMOS process, the ADV7525 is available in a space-saving, 64-ball, WLCSP surface-mount package. This package is RoHS compliant and specified to operate from -25° C to $+85^{\circ}$ C

For more information on the ADV7525, contact Analog Devices, Inc., at ATV_VideoTx_Apps@analog.com.
