Triple 2-channel analog multiplexer/demultiplexerRev. 2 — 22 November 2012Prod

Product data sheet

1. General description

The 74HC4053-Q100; 74HCT4053-Q100 is a high-speed Si-gate CMOS device and is pin compatible with Low-power Schottky TTL (LSTTL). It is specified in compliance with JEDEC standard no. 7A.

The 74HC4053-Q100; 74HCT4053-Q100 is triple 2-channel analog multiplexer/demultiplexer with a common enable input (E). Each multiplexer/demultiplexer has two independent inputs/outputs (nY0 and nY1), a common input/output (nZ) and three digital select inputs (Sn). With \overline{E} LOW, one of the two switches is selected (low-impedance ON-state) by S1 to S3. With \overline{E} HIGH, all switches are in the high-impedance OFF-state, independent of S1 to S3.

 V_{CC} and GND are the supply voltage pins for the digital control inputs (S0 to S2, and \overline{E}). The V_{CC} to GND ranges are 2.0 V to 10.0 V for 74HC4053-Q100, and 4.5 V to 5.5 V for 74HCT4053-Q100. The analog inputs/outputs (nY0 to nY1, and nZ) can swing between V_{CC} as a positive limit and V_{EE} as a negative limit. $V_{CC} - V_{EE}$ may not exceed 10.0 V.

For operation as a digital multiplexer/demultiplexer, V_{EE} is connected to GND (typically ground).

This product has been qualified to the Automotive Electronics Council (AEC) standard Q100 (Grade 1) and is suitable for use in automotive applications.

Features and benefits 2.

- Automotive product gualification in accordance with AEC-Q100 (Grade 1)
 - Specified from –40 °C to +85 °C and from –40 °C to +125 °C
- Wide analog input voltage range from –5 V to +5 V
- Low ON resistance:
 - 80 Ω (typical) at V_{CC} V_{EE} = 4.5 V
 - 70 Ω (typical) at V_{CC} V_{EE} = 6.0 V
 - 60 Ω (typical) at V_{CC} V_{EE} = 9.0 V
- Logic level translation: to enable 5 V logic to communicate with ±5 V analog signals
- Typical 'break before make' built-in
- ESD protection:
 - MIL-STD-883, method 3015 exceeds 2000 V
 - HBM JESD22-A114F exceeds 2000 V
 - MM JESD22-A115-A exceeds 200 V (C = 200 pF, R = 0 Ω)
 - CDM AEC-Q100-011 revision B exceeds 1000 V
- Multiple package options

Triple 2-channel analog multiplexer/demultiplexer

3. Applications

- Analog multiplexing and demultiplexing
- Digital multiplexing and demultiplexing
- Signal gating

Table 3.	Function table [1]		
Inputs			Channel on
E		Sn	
L		L	nY0 to nZ
L		Н	nY1 to nZ
Н		Х	switches off

[1] H = HIGH voltage level; L = LOW voltage level; X = don't care.

8. Limiting values

Table 4.Limiting values

In accordance with the Absolute Maximum Rating System (IEC 60134). Voltages are referenced to $V_{SS} = 0 V$ (ground).

		0, 1, , 0		00	0 /
Symbol	Parameter	Conditions	Min	Max	Unit
V _{CC}	supply voltage		<u>[1]</u> –0.5	+11.0	V
I _{IK}	input clamping current	$V_{I} < -0.5$ V or $V_{I} > V_{CC}$ + 0.5 V	-	±20	mA
I _{SK}	switch clamping current	V_{SW} < –0.5 V or V_{SW} > V_{CC} + 0.5 V	-	±20	mA
I _{SW}	switch current	$-0.5 \text{ V} < \text{V}_{\text{SW}} < \text{V}_{\text{CC}} + 0.5 \text{ V}$	-	±25	mA
I _{EE}	supply current		-	±20	mA
I _{CC}	supply current		-	50	mA
I _{GND}	ground current		-	-50	mA
T _{stg}	storage temperature		-65	+150	°C
P _{tot}	total power dissipation		[2] _	500	mW
Р	power dissipation	per switch	-	100	mW
-					

[1] To avoid drawing V_{CC} current out of terminal nZ, when switch current flows into terminals nYn, the voltage drop across the bidirectional switch must not exceed 0.4 V. If the switch current flows into terminal nZ, no V_{CC} current flows out of terminals nYn. In this case, there is no limit for the voltage drop across the switch, but the voltages at nYn and nZ may not exceed V_{CC} or V_{EE}.

[2] For SO16 package: above 70 °C the value of P_{tot} derates linearly with 8 mW/K. For TSSOP16 package: above 60 °C the value of P_{tot} derates linearly with 5.5 mW/K. For DHVQFN16 package: above 60 °C the value of P_{tot} derates linearly with 4.5 mW/K.

10. Static characteristics

Table 6. R_{ON} resistance per switch for 74HC4053-Q100 and 74HCT4053-Q100

 $V_I = V_{IH}$ or V_{IL} ; for test circuit see <u>Figure 9</u>.

 V_{is} is the input voltage at a nYn or nZ terminal, whichever is assigned as an input. V_{os} is the output voltage at a nYn or nZ terminal, whichever is assigned as an output. For 74HC4053-Q100: V_{CC} – GND or V_{CC} – V_{EE} = 2.0 V, 4.5 V, 6.0 V and 9.0 V. For 74HCT4053-Q100: V_{CC} – GND = 4.5 V and 5.5 V, V_{CC} – V_{EE} = 2.0 V, 4.5 V, 6.0 V and 9.0 V.

$\Delta R_{ON} \text{ ON resistance mismatch between channels} \begin{cases} \frac{1}{V_{CC}} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 100 180 \\ V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 90 160 \\ V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 70 130 \\ V_{CC} = 4.5 \text{ V; } V_{EE} = -4.5 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 11 - 150 \\ V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 80 140 \\ V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 80 140 \\ V_{CC} = 6.0 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 80 140 \\ V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 60 105 \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = -4.5 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 60 105 \\ \hline V_{IS} = V_{CC} \\ \hline V_{CC} = 2.0 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 90 160 \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 90 160 \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 90 160 \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 80 140 \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 80 140 \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 80 140 \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 80 140 \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 1000 \ \mu\text{A} & . 80 140 \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V} \text{ III } \\ \hline V_{CC} = 2.0 \text{ V; } V_{EE} = 0 \text{ V} \text{ III } \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V} \text{ III } \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V} \text{ III } \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V} \text{ III } \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V} \text{ III } \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V} \text{ III } \\ \hline V_{CC} = 4.5 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 100 \ \mu\text{A} \text{ III } \\ \hline V_{CC} = 2.0 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 100 \ \mu\text{A} \text{ III } \\ \hline V_{CC} = 2.0 \text{ V; } V_{EE} = 0 \text{ V; } I_{SW} = 100 \ \mu\text{A} \text{ III } \\ \hline V_{CC} = 4.5 $	ol Pa	Parameter	Conditions	Min	Тур	Max	Unit

 $\label{eq:tpd} \mbox{[1]} \quad t_{pd} \mbox{ is the same as } t_{PHL} \mbox{ and } t_{PLH}.$

- $\label{eq:ton} \mbox{[2]} \quad t_{\mbox{on}} \mbox{ is the same as } t_{\mbox{PZH and }} t_{\mbox{PZL}}.$
- $[3] \quad t_{off} \mbox{ is the same as } t_{PHZ} \mbox{ and } t_{PLZ}.$
- [4] C_{PD} is used to determine the dynamic power dissipation (P_D in μ W).

 $P_{D} = C_{PD} \times V_{CC}^{2} \times f_{i} \times N + \Sigma \{(C_{L} + C_{sw}) \times V_{CC}^{2} \times f_{o}\} \text{ where:}$

 $f_i = input frequency in MHz;$

 f_o = output frequency in MHz;

N = number of inputs switching;

 Σ {(C_L + C_{sw}) × V_{CC}² × f_o} = sum of outputs;

 C_L = output load capacitance in pF;

 C_{sw} = switch capacitance in pF;

 V_{CC} = supply voltage in V.

Triple 2-channel analog multiplexer/demultiplexer

Definitions for test circuit; see Table 11:

 R_T = termination resistance should be equal to the output impedance Z_0 of the pulse generator.

- C_L = load capacitance including jig and probe capacitance.
- R_L = load resistance.
- S1 = Test selection switch.

Fig 15. Test circuit for measuring switching times

Triple 2-channel analog multiplexer/demultiplexer

Table 11. Test data

Test	Input						S1 position
	VI	V _{is}	t _r , t _f	t _r , t _f		RL	
			at f _{max}	other ^[1]			
t _{PHL} , t _{PLH}	[2]	pulse	< 2 ns	6 ns	50 pF	1 kΩ	open
t _{PZH} , t _{PHZ}	[2]	V _{CC}	< 2 ns	6 ns	50 pF	1 kΩ	V _{EE}
t _{PZL} , t _{PLZ}	[2]	V_{EE}	< 2 ns	6 ns	50 pF	1 kΩ	V _{CC}

[1] $t_r = t_f = 6$ ns; when measuring f_{max} , there is no constraint to t_r and t_f with 50 % duty factor.

[2] V_I values:

a) For 74HC4053-Q100: V_I = V_{CC}

b) For 74HCT4053-Q100: V_I = 3 V

11.1 Additional dynamic characteristics

Table 12. Additional dynamic characteristics

Recommended conditions and typical values; GND = 0 V; $T_{amb} = 25$ °C; $C_L = 50 pF$. V_{is} is the input voltage at pins nYn or nZ, whichever is assigned as an input. V_{os} is the output voltage at pins nYn or nZ, whichever is assigned as an output.

Symbol	Parameter	Conditions	Min	Тур	Max	Unit

15. Legal information

15.1 Data sheet status

Document status[1][2]	Product status ^[3]	Definition
Objective [short] data sheet	Development	This document contains data from the objective specification for product development.
Preliminary [short] data sheet	Qualification	This document contains data from the preliminary specification.
Product [short] data sheet	Production	This document contains the product specification.

[1] Please consult the most recently issued document before initiating or completing a design.

[2] The term 'short data sheet' is explained in section "Definitions".

[3] The product status of device(s) described in this document may have changed since this document was published and may differ in case of multiple devices. The latest product status information is available on the Internet at URL http://www.nxp.com.

15.2 Definitions

Draft — The document is a draft version only. The content is still under internal review and subject to formal approval, which may result in modifications or additions. NXP Semiconductors does not give any representations or warranties as to the accuracy or completeness of information included herein and shall have no liability for the consequences of use of such information.

Short data sheet — A short data sheet is an extract from a full data sheet with the same product type number(s) and title. A short data sheet is intended for quick reference only and should not be relied upon to contain detailed and full information. For detailed and full information see the relevant full data sheet, which is available on request via the local NXP Semiconductors sales office. In case of any inconsistency or conflict with the short data sheet, the full data sheet shall prevail.

Product specification — The information and data provided in a Product data sheet shall define the specification of the product as agreed between NXP Semiconductors and its customer, unless NXP Semiconductors and customer have explicitly agreed otherwise in writing. In no event however, shall an agreement be valid in which the NXP Semiconductors product is deemed to offer functions and qualities beyond those described in the Product data sheet.

15.3 Disclaimers

Limited warranty and liability — Information in this document is believed to be accurate and reliable. However, NXP Semiconductors does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information and shall have no liability for the consequences of use of such information. NXP Semiconductors takes no responsibility for the content in this document if provided by an information source outside of NXP Semiconductors.

In no event shall NXP Semiconductors be liable for any indirect, incidental, punitive, special or consequential damages (including - without limitation - lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) whether or not such damages are based on tort (including negligence), warranty, breach of contract or any other legal theory.

Notwithstanding any damages that customer might incur for any reason whatsoever, NXP Semiconductors' aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the *Terms and conditions of commercial sale* of NXP Semiconductors.

Right to make changes — NXP Semiconductors reserves the right to make changes to information published in this document, including without limitation specifications and product descriptions, at any time and without notice. This document supersedes and replaces all information supplied prior to the publication hereof.

Suitability for use in automotive applications - This NXP

Semiconductors product has been qualified for use in automotive applications. Unless otherwise agreed in writing, the product is not designed, authorized or warranted to be suitable for use in life support, life-critical or safety-critical systems or equipment, nor in applications where failure or malfunction of an NXP Semiconductors product can reasonably be expected to result in personal injury, death or severe property or environmental damage. NXP Semiconductors and its suppliers accept no liability for inclusion and/or use of NXP Semiconductors products in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk.

Applications — Applications that are described herein for any of these products are for illustrative purposes only. NXP Semiconductors makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

Customers are responsible for the design and operation of their applications and products using NXP Semiconductors products, and NXP Semiconductors accepts no liability for any assistance with applications or customer product design. It is customer's sole responsibility to determine whether the NXP Semiconductors product is suitable and fit for the customer's applications and products planned, as well as for the planned application and use of customer's third party customer(s). Customers should provide appropriate design and operating safeguards to minimize the risks associated with their applications and products.

NXP Semiconductors does not accept any liability related to any default, damage, costs or problem which is based on any weakness or default in the customer's applications or products, or the application or use by customer's third party customer(s). Customer is responsible for doing all necessary testing for the customer's applications and products using NXP Semiconductors products in order to avoid a default of the applications and the products or of the application or use by customer's third party customer(s). NXP does not accept any liability in this respect.

Limiting values — Stress above one or more limiting values (as defined in the Absolute Maximum Ratings System of IEC 60134) will cause permanent damage to the device. Limiting values are stress ratings only and (proper) operation of the device at these or any other conditions above those given in the Recommended operating conditions section (if present) or the Characteristics sections of this document is not warranted. Constant or repeated exposure to limiting values will permanently and irreversibly affect the quality and reliability of the device.

Terms and conditions of commercial sale — NXP Semiconductors products are sold subject to the general terms and conditions of commercial sale, as published at http://www.nxp.com/profile/terms, unless otherwise agreed in a valid written individual agreement. In case an individual agreement is concluded only the terms and conditions of the respective agreement shall apply. NXP Semiconductors hereby expressly objects to applying the customer's general terms and conditions with regard to the purchase of NXP Semiconductors products by customer.

Triple 2-channel analog multiplexer/demultiplexer

No offer to sell or license — Nothing in this document may be interpreted or construed as an offer to sell products that is open for acceptance or the grant, conveyance or implication of any license under any copyrights, patents or other industrial or intellectual property rights.

Export control — This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from competent authorities.

Translations — A non-English (translated) version of a document is for reference only. The English version shall prevail in case of any discrepancy between the translated and English versions.
