Battery Interconnects

Product Facts

- Multi-directional mating all angles between 0° and 90°
- Standard 5-position system
- Total interface solution
- Current capacity 7 Amps/ single contact at 30°C T-Rise
- Choice of right angle or vertical mount headers with left, right or keyless polarization
- Headers available for 7.2, 10.8, and 12.0 volt rechargeable batteries
- Receptacle connectors with solder tails or weld tabs
- Consumer friendly mating/unmating of battery
- Reduces design cycle time
- Reduces overall costs
- Produced under a Quality Management System certified to ISO 9001
- Two-Piece Connector
- Blade Contacts for high durability
- Used Industry-wide for rechargeable battery I/O in laptop computers
- Offered in a variety of key arrangement — for different voltage batteries
- 2.5mm, 3.0mm and 5.0mm contact pitch
- Up to 7 Amps per contact
- Up to 2500 cycle durability
- Two pc tails per blade for better current distribution

Since the introduction of the Duracell, standard-sized nickel-metal hydride rechargeable battery to the computer and communications original equipment manufacturers (OEMs), Tyco Electronics has played a major role in the development and manufacture of a reliable, high performance multidirectional interconnect system.

As the Duracell line of rechargeable batteries expanded to newer and more diversified uses, so have Tyco Electronics Battery Interconnect Systems. Today, systems are available for:

- DR17 (7.2 Volts)
- DR30 (7.2 Volts)
- DR15 (10.8 Volts)
- DR35 (10.8 Volts)
- DR36 (12.0 Volts)

These 5-position headers and the Tyco Electronics

5-position receptacle connectors provide reliable, easy mate/unmate interconnects.

Single contacts are rated at 7 amperes with a 30°C T-Rise, and have an operating temperature rating of -30°C to +70°C. Headers feature sturdy brass contacts with duplex plated tin-lead solder tails and nickel on the mating area to ensure the life of the system and to provide high cycle mating/unmating.

Housings are made of high temperature, U.L. 94V-0 rated thermoplastic and are available with left or right hand keying, or with keyless mounting configurations. Keyless headers are designed to minimize board space requirements, and require the battery manufacturer to provide voltage key in the battery rack compartment. Keyless headers accept all 3 voltage battery packs. Tyco Electronics "Drop-In" receptacle connectors fit securely within the battery pack compartment. They are offered in a choice of weld tab or solder tail versions for PC board mounting. Housings are made from high impact U.L. 94V-0 rated thermoplastic with high temperature housings available for solder tail versions.

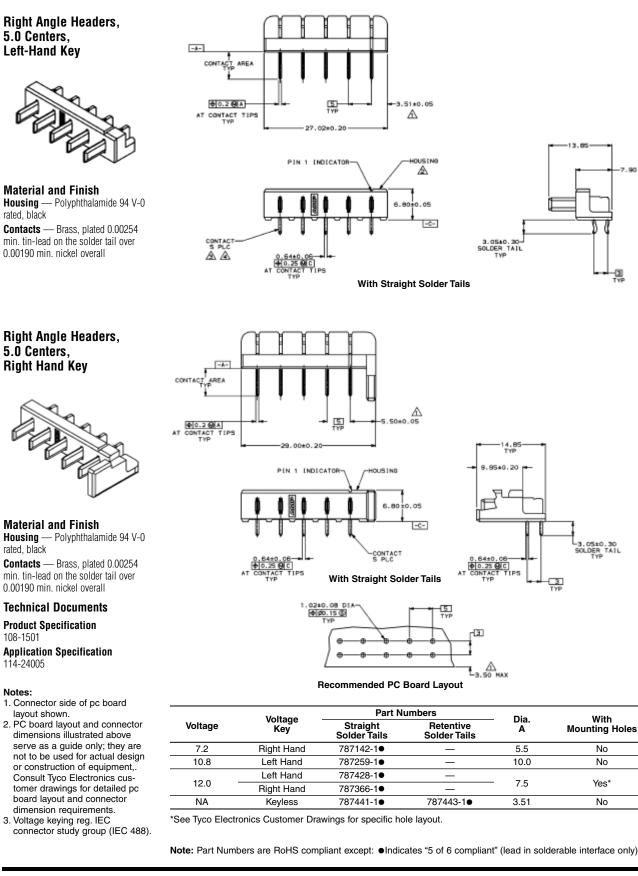

The Tyco Electronics Battery Interconnection systems provide variable direction mating and voltage/form factor polarization for safe, friendly operation.

Tyco Electronics Battery Interconnection System, Cable-to-Board Connector Assembly

Product Facts

- Offers OEM manufacturers complete design flexibility
- Tyco Electronics cable assembly design engineers assist on your specific assembly requirements
- Standard or customized mounting options
- Double or single ended assemblies
- Wide choice of other end Tyco Electronics connectors to complete your assembly
- Manufacturing labor and overhead cost savings
- Inventory cost savings with Tyco Electronics Just-In-Time Delivery
- Eliminates Down-Time, all assemblies individually inspected prior to shipping

Tyco Electronics Battery Interconnect System, Cable-to-Board Connector Assembly is designed to maximize your manufacturing capabilities, and offers greater flexibility in your design cycle.

This assembly is presently available with a keyless battery connector on the mating end and a Tyco Electronics CST-100 connector on the internal connection end.

Tyco Electronics will consult with you, in the design or post-design stage, to introduce our complete cable-to-board connector assembly design and manufacturing capabilities to meet your specific battery interconnect system connector assembly requirements.

Call the Tyco Electronics Product Information Center, for immediate information on this new, exciting service for the OEM systems designer.

Special Battery Connectors

Product Facts

- 3-, 6-, 7- and 10-position at 2.0mm pitch; 4, 5, 6 and 7 positions at 2.5mm centerline; 8- and 10-position at 3.0mm centerline
- Housings have an excellent heat resistant property and are durable with the through-hole reflow techniques
- Contacts are made of gold plated, high conductivity, copper alloy
- 2.5mm centerline plugs are available with DIP types and SMT offset types for thinner equipment. Receptacles are available only with SMT types

As the sizes of mobile equipment, such as notebook PCs, portable telephones, etc. are becoming smaller and thinner, the spaces for battery packs also require the best space efficiency.

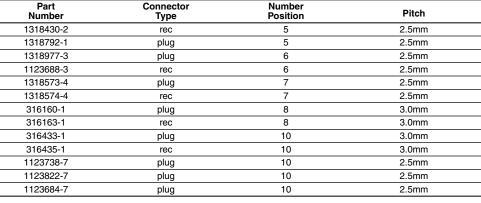

Tyco Electronics Battery Connectors are available to meet the requirements of extremely high space efficiency of small size mobile equipment with the line contact concept and are available at 2.5mm and 3.0mm centerlines.

These connectors offer significant space savings with enough contact area to secure the connection. They connect the battery spaces apt to be affected by cumulative total of tolerances and the equipment of high reliability.

Coin-Cell Battery Holders

Product Facts

- Accepts BR2032 and CR2032 Lithium Ion Battery Cells
 - Vertical orientation available with solder tails
- Low profile horizontal orientation with solder tail or SMT terminations
- Designed for reliable (twin-beam) connection for the back-up battery on motherboards for desktop and notebook PC's.
- Designed for plated through hole (PTH) soldering and surface mount soldering
- Self-ejecting design allows battery to be removed without tools
- Accepts ML 616 and ML 614 batteries

Typical Application

- Internet routers
- Handhelds
- Vending machines

Technical Document Product Specification 108-1691

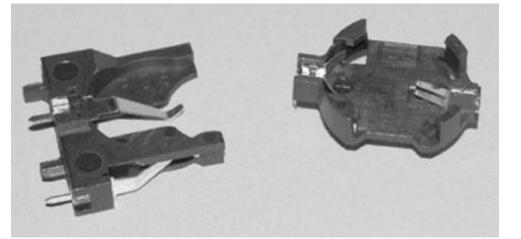

Tyco Electronics Top Load Battery is a high reliable receptacle for coin-cell (BR 2032 and CR2032) batteries. These batteries are used as battery back-ups in computers to store the RTC (real time clock) and other CMOS RAM data when the computer is not turned on. It can also be used in a variety of other electronic equipment needing a compact low wattage (typically less than 2Watts) battery source.

The polarized pcb layout and tin plated twin-beam contact design of the horizontal battery holders ensure easy printed circuit board (pcb) assembly and long term connection reliability, along with easy battery removal. The vertical mount battery holders reduce both the required pcb space and the overall height required for an optimum high-density pcb design. Surface Mount and re-flow compatible options are also ready to meet the newer pcb assembly requirements. Top Load battery connectors can be supplied in tube, tray or reel packaging methods or tray.

■ 6-position, 2mm interface shrouded on both sides

Electronics

- Offers blind mating from 0 to 90 mating angle
- Solder tail and SMT pcb termination
- 6-position receptacle and header interconnection on 2.0mm
- Ideal for high density application
- Connectors can be mated at any angle between 0° and 90⁸
- Durable 2500 cycles, contacts with 0.00076 min. AMP-DURAGOLD plating over 0.00127 min. nickel underplating
- High reliability for docking applications — portable hand held devices, measurement equipment, documentation control and interconnections for rechargeable batteries for lap-top and notebook computers
- 0.00380 min. tin on solder tails
- Versatile solder operation for board-to-board applications
- Produced under a Quality Management System certified to ISO 9001 A copy of the certificate is available upon request.
- Recognized under the **Component Program of** Underwriters Laboratories. Inc. File No. E28476
 - FI
- Certified Pending by **Canadian Standards** Association. File No. LR 16455

Technical Documents Product Specifications 108-1503 108-1503-1

The rapid growth of the portable equipment market has fostered a need for a high density and versatile interconnection system. Tyco Electronics Multi-Directional Interconnection System answers this need. The system consists of 6-position receptacles and headers featuring contacts on 2.0mm centerlines. This multi-directional interconnection system is designed to permit mating/unmating at any angle between 0° and 90°. This durable system features AMP-DURAGOLD plated contacts for positive mating/unmating up to 2500 cycles.

Housings are made of UL 94V-0 rated, high temperature thermoplastic, compatible with IR and reflow solder techniques.

The multi-directional aspect and durability of this system make it ideal for docking connector applications in a variety of portable hand held devices, measurement equipment, documentation control, and interconnections for rechargeable batteries used in laptop and notebook type computers.

Tyco Electronics Multi-Directional Interconnection System is your total interface problem solver. It reduces your design cycle time, time-tomarket, and provides an overall reduced cost of manufacturing.

- Recommended minimum trace width for end positions when carrying 3 amps — 0.00180 wide x 0.00055 thick, both sides.

6 Position Header Assembly with Straight Solder Tails

Part Number 5787531-1

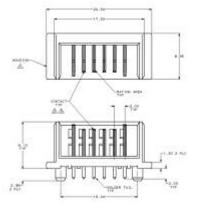

Material and Finish

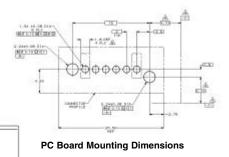

Housing — LCP, 94V-0 rated, black Contacts — Brass, plated 0.00076 min. AMP-DURAGOLD on mating area, 0.00380 min. tin on solder tail, all over 0.00127 min. nickel

Notes:

Laptops/Portables

- 1. Datum and dimensions established by customer.
- 2. Recommended minimum trace width for end positions when carrying 3 amps — 0.00180 wide x 0.00055 thick, both sides.

Note: All part numbers are RoHS compliant.

DC Power Jacks

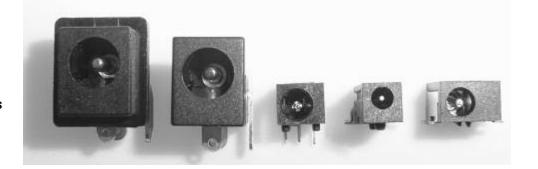

Product Facts

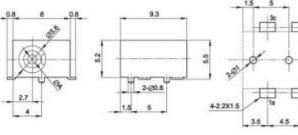

- Low Profile Design
- Accepts industry standard DC power plugs
- Available with:
 - Solder tabs
 - Through-hole solder tails
 - SMT leads
- Available to accept these plug sizes:
 - 0.65mm
 - 1.0mm
 - 1.3mm
 - 1.47mm
 - 1.87mm
 - 2.0mm
 - 2.35mm
 - 2.5mm
- Ideal for portable electric devices
