## Altera<sup>™</sup> MT1000 Semi-Rigid, Modified Polyvinylidene Fluoride, Heat Shrinkable Tubing

This specification covers the requirements for one type of single wall, electrical insulating, extruded tubing whose diameter will reduce to a predetermined size upon application of heat in excess of 175° C (347° F).

The tubing is fabricated from modified polyvinylidene fluoride crosslinked by irradiation. It shall be homogenous and essentially free from flaws, defects, pinholes, seams, cracks or inclusions.

The tubing is fabricated from materials which meet the requirements of U.S. Pharmacopeia Class VI Plastics. Color shall be translucent unless otherwise specified.
