

Rotary Switches, 500m Amp, Adjustable Stop, 36° Throw

MATERIAL SPECIFICATIONS:

ContactsSilver
 Case MaterialAluminum
 Actuator MaterialBrass
 Terminals/Fixed Contacts.....Silver plated brass
 Terminal SealInsert molded, DAP bas

ENVIRONMENTAL SPECIFICATIONS:

Operating Temperature.....-4°F to +176°F (-20°C to +80°C)
 Storage Temperature-4°F to +212°F (-20°C to +100°C)
 Solder Heat Resistance.....Manual: 270°C for 3 seconds
 Wave: 245°C for 3 seconds

TYPICAL PERFORMANCE CHARACTERISTICS:

Contact Rating500 Milliamps @ 125 VAC or
 28 VDC resistive
 Initial Contact Resistance.....50 Milliohms max.
 Contact Timing.....Non-shorting
 Insulation Resistance100 Megohms min.
 Dielectric Strength1,000 Volts RMS @ sea level
 Rotation Torque14 Inch ounce max.
 High Torque Bushing ShoulderNickle plated brass
 Plunger/Actuator Travel.....36°
 Life ExpectancyUp to 10,000 Cycles @ full contact
 rating
 Up to 25,000 Cycles @ 150 mA @
 125 VAC or 250 mA @ 28 VDC

NOTICE: Set stop positions by presetting external pin plate provided.

4 Pole, 2 Positions

3 Pole, 2-3 Positions, Adjustable

2 Pole, 2-5 Positions, Adjustable

1 Pole, 2-10 Positions, Adjustable

36° ANGLE OF THROW

* Two common terminals are internally shorted. Use either one.

MRC33S

Part Number		No. Poles	Adjustable Positions
Tyco Electronics	Alcoswitch		
1437629-2	MRC110S	1 Pole	2 to 10 Positions
1437629-4	MRC25S	2 Poles	2 to 5 Positions
1437629-6	MRC33S	3 Poles	2 to 3 Positions
1437629-8	MRC42S	4 Poles	2 Positions (fixed)

36° ANGLE OF THROW

KNOB NOT SOLD SEPARATELY

* Two common terminals are internally shorted. Use either one.

MRC25

Part Number		No. Poles	Adjustable Positions
Tyco Electronics	Alcoswitch		
1437629-1	MRC110	1 Pole	2 to 10 Positions
1437629-3	MRC25	2 Poles	2 to 5 Positions
1437629-5	MRC33	3 Poles	2 to 3 Positions
1437629-7	MRC42	4 Poles	2 Positions (fixed)

Rotary Switches, 6000 Series

Alcoswitch 6000 Series Rotary Switches are used in programming electrical and mechanical circuits in machine tools, test equipment, and input data terminals. These manually operated switches are specifically designed to be mounted on a pc board and offer output capabilities which include: 8-position binary-coded octal (BC), 10-position binary-coded decimal (BCD), 16-position hexadecimal plus 10- and 16-position single pole decimal. All switches feature a small diameter and very low profile.

In addition to varied output capabilities, these versatile Alcoswitch switches can also be supplied in three different styles, allowing you to select the operation method best suited to your specific application. One version incorporates a slot which accepts a screwdriver, coin or other similar device. This particular style permits operation of the switch without sacrificing overall height. Its height of .220 [5.59] above the pc board is no greater than the usual board-mounted discrete components. The other two versions have either a bar-type knob or thumbwheel for their operation. All three styles can be rotated bidirectionally.

Rugged construction, positive detent action contacts plus large, readable characters are additional features of the Alcoswitch 6000 Series PC Board Rotary Switches. All these features, coupled with a fully enclosed design for better environmental protection, provide excellent electrical and mechanical performance.

PERFORMANCE CHARACTERISTICS

- Current/Voltage Rating**— Signal application only.
- Dielectric Breakdown Voltage**— 500 VDC min.
- Insulation Resistance**— 1 x 10⁸ ohms
- Initial Contact Resistance**— 25 milliohms (at 50 millivolts, 100 milliamperes) closed circuit
- Circuit Capacitance**— 5 picofarads (at 100 KHz)
- Durability**— 1000 cycles
- Operating Torque**— 2 - 12 inch-ounces initial and after durability
- Temperature Rating**—
- Operating** — -18°C to +88°C
- Storage** — -45°C to +88°C
- Humidity**— Withstands an environment of +40°C and 95% RH for 96 hours

MATERIALS

- Contacts**— Phosphor bronze, gold over nickel plated
- Solder Tabs and Pins**—
- Coded Switches** — Beryllium copper, tin plated
- Single Pole Switches** — Brass, tin plated
- Structural Parts** — Thermoplastic

Technical Documents

- Product Specification**— 108-7514
- Instruction Sheet**— 408-07523
- Application Specification**— 114-7005

Product Facts

- n **Compact design** — small diameter, low profile switches are ideal for pc board mounting
- n **Wide choice of outputs:** 8-position binary-coded octal, 10-position binary-coded decimal, 16-position hexadecimal and 10- and 16-position single pole
- n **Versatile application** — styles include slotted, bar-type and thumbwheel versions for hand rotation
- n **Positive switching** — contacts have positive detent action
- n **All positions are easily identified** by large readable characters or dots
- n **Optimum reliability** — fully enclosed design protects contacts against contamination

3100 Series Rotary Switches

Alcoswitch Rotary Switches provide a highly reliable means of manually programming various types of electronic equipment. They are specifically designed for logic level circuitry, but are capable of controlling electrical circuits that operate at current ratings of 2 amperes, 115 VAC (nonswitching) and up to 125 milliamperes, 115 VAC (switching).

Positive detent action, with a quick make/break operation, is provided by durable stainless steel balls and springs as well as the detents which form an integral part of the housing. All contact surfaces are fully enclosed within the housing, thus greatly reducing operational failures due to dirty contacts. The contacts are made of phosphor bronze with gold-over-nickel plating.

Alcoswitch Rotary Switches can be supplied with a variety of options to afford complete application versatility and adaptability. Output codes include decimal, BCD and BCD complement with 10, 12, 16, 24 and 32 switching positions.

Interconnection of switches may be achieved by the use of AMPMODU receptacles. Stops supplied with the switches may be customer installed when it is desired to limit rotation to less than 360°.

PERFORMANCE CHARACTERISTICS

- Circuit Current Rating—**
- Nonswitching** — 2.0 amperes at 115 VAC max.
- Switching (Resistive Load)** — 125 milliamperes at 115 VAC max.
- Dielectric Withstanding Voltage—**
- 500 VDC
- Insulation Resistance—**
- 1 x 10⁸ ohms min. at 100 VDC
- Initial Contact Resistance—**
- 150 milliohms (input terminal to output terminal)
- Initial Operating Force—**
- 1/2 to 2 in.-lbs.
- Contact Life Expectancy—**
- 25,000 rotations at rated load
- Operating Temperature—**
- 18°C to +88°C

MATERIALS

- Housing—**
- Polyester, black
- Detent Ball and Spring—**
- Stainless steel
- Operating Shaft and Detent—**
- Thermoplastic, 94V-0 rated, black
- Printed Circuit Board—**
- Flame retardant, glass epoxy laminate, copper clad
- Contacts—**
- Phosphor bronze, gold-over-nickel plated
- Hardware—**
- Brass or corrosion resistant steel

TECHNICAL DOCUMENTS

- Product Specification—**
- 108-7518
- Instruction Sheet—**
- 408-07936

Product Facts

- ▢ **Code flexibility — switch output capabilities include decimal, BCD and BCD complement, and various other codes**
- ▢ **Positive switching — positive detent action of stainless steel detent balls and springs assures error-free operation**
- ▢ **Enclosed contacts — contact surfaces are better protected against dirt, dust and other environmental hazards**
