HMC910LC4B

v03.1211

BROADBAND ANALOG TIME DELAY, DC - 24 GHz

Typical Applications

The HMC910LC4B is ideal for:

- Synchronization of clock and data
- Transponder design
- Serial Data Transmission up to 32 Gbps
- Broadband Test & Measurement
- RF ATE Applications

Features

Very Wide Bandwidth: DC - 24 GHz

Continuous Adjustable Delay Range: 70 ps

Single-Ended or Differential Operation

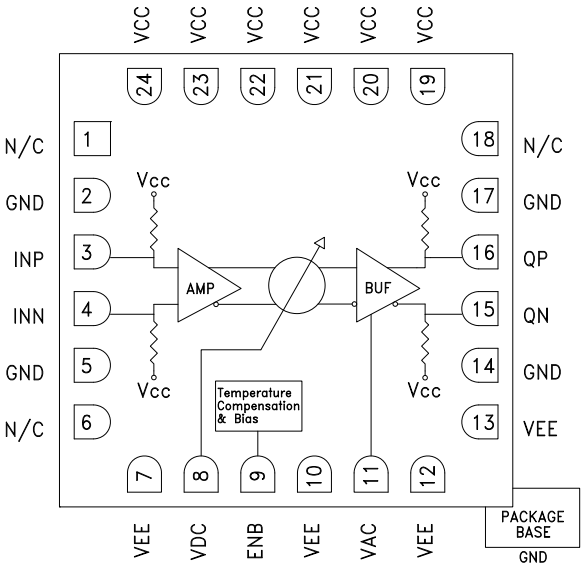
Adjustable Differential Output Voltage Swing: 170 - 760 mVp-p @ 24 GHz

Delay Control Modulation Bandwidth: 10 MHz

Single Supply: +3.3V

24 Lead Ceramic 4x4mm SMT Package: $16mm^2$

Functional Diagram



General Description

The HMC910LC4B is a broadband time delay with 0 to 70 ps continuously adjustable delay range. The delay control is linearly monotonic with respect to the control voltage, VDC and the control input has a modulation bandwidth of 10 MHz. The device provides a differential output voltage with constant amplitude for single-ended or differential input voltages above the input sensitivity level, while the output voltage swing may be adjusted using the VAC control pin. The HMC910LC4B features internal temperature compensation and bias circuitry to minimize delay variations with temperature. The device also features an enable pin, ENB. All RF input and outputs of the HMC910LC4B are internally terminated with 50 Ohms to Vcc, and may either be AC or DC coupled. Output pins can be connected directly to a 50 Ohm to Vcc terminated system, while DC blocking capacitors must be used if the terminated system input is 50 Ohms to a DC voltage other than Vcc.

[2] Circuit Board Material: Rogers 4350 or Arlon 25 FR

The circuit board used in the application should use RF circuit design techniques. Signal lines should have 50 Ohm impedance while the package ground leads and exposed paddle should be connected directly to the ground plane similar to that shown. A sufficient number of via holes should be used to connect the top and bottom ground planes. The evaluation board should be mounted to an appropriate heat sink. The evaluation circuit board shown is available from Hittite upon request.
