

## Evaluation Board for the **ADF4155** PLL Frequency Synthesizer

### FEATURES

Self-contained board, including **ADF4155** synthesizer, differential 122.88 MHz temperature controlled crystal oscillator (TCXO), voltage controlled oscillator (VCO) 5.725 GHz to 5.875 GHz, loop filter, USB interface, and voltage regulators

Designed for a 61.44 MHz phase frequency detector (PFD) frequency, 0.9 mA charge pump current ( $I_{CP}$ ), and 80 kHz loop bandwidth

Accompanying software allows complete control of synthesizer functions from a PC

Externally powered by 5.5 V

### EVALUATION KIT CONTENTS

**EV-ADF4155EB1Z** board  
CD with evaluation software  
USB cable

### REQUIRED ADDITIONAL EQUIPMENT

Windows®-based PC with USB port for evaluation software  
Power supply (5.5 V)  
Spectrum analyzer  
50  $\Omega$  terminators

### DOCUMENTS NEEDED

**ADF4155** data sheet  
**EV-ADF4155EB1Z** user guide  
**UG-476** user guide

### REQUIRED SOFTWARE

Analog Devices **ADF4155** software, Version 1.0.0 or higher (included on the CD in the evaluation board kit or available for download at [www.analog.com](http://www.analog.com))

### GENERAL DESCRIPTION

The **EV-ADF4155EB1Z** board evaluates the performance of the **ADF4155** frequency synthesizer for phase-locked loops (PLLs). A photograph of the evaluation board is shown in Figure 1. The evaluation board contains the **ADF4155** synthesizer, the loop filter, a VCO, a differential 122.88 MHz reference TCXO, a USB interface, power supply connectors, and SMA connectors. A USB cable is included to connect the board to a PC USB port.

In addition, the evaluation kit contains Windows-based software to allow easy programming of the synthesizer.

REVISION HISTORY

6/14—Revision 0: Initial Version

## GETTING STARTED

### SOFTWARE INSTALATION PROCEDURES

To install the software, see the [UG-476](#) user guide. The CD in the evaluation board kit contains the control software for the [EV-ADF4155EB1Z](#).

### EVALUATION BOARD SETUP PROCEDURES

To run the software,

1. Click the [ADF4155](#) file on the desktop or from the **Start** menu.
2. On the **Select Device and Connection** tab, choose [ADF4155](#) and **USB board (green)**, and then click **Connect** (see Figure 2).
3. Confirm that **Analog Devices RFG.L Eval Board connected** is displayed at the bottom left of the window. Note that when connecting the board; allow 5 sec to 10 sec for the status label to change.
4. Under the **File** menu, the current settings can be saved to and loaded from a text file.

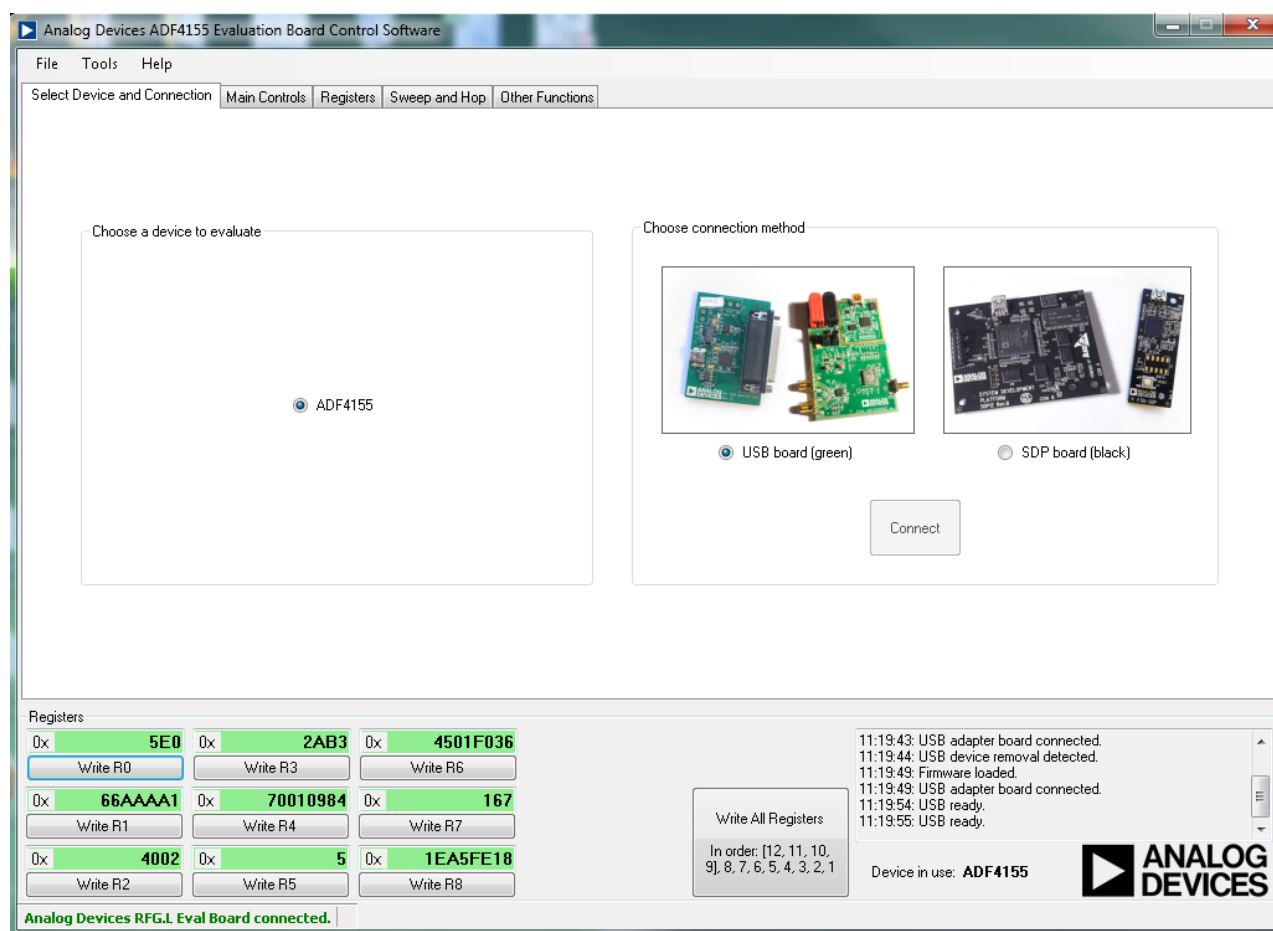

Figure 2. Software Front Panel Display—Select Device and Connection

## EVALUATION BOARD HARDWARE

The [EV-ADF4155EB1Z](#) schematics are shown in Figure 7, Figure 8, Figure 9, and Figure 10. The silkscreen for the evaluation board is shown in Figure 11 and Figure 12.

### POWER SUPPLIES

The board is powered by a 5.5 V power supply connected to the red and black banana connectors. Connect the red connector to a 5.5 V power supply and the black connector to ground.

The power supply circuit uses the [ADP151AUJZ-3.3](#) low noise, low dropout (LDO) linear regulators to provide the required 3.3 V supplies. The low noise, [ADP7104ACPZ-5.0-R7](#) regulators provide the required 5 V supplies.

The USB host powers the USB section of the evaluation board (see the area bounded by the gold box in Figure 1).

### LOCAL OSCILLATOR

The 122.88 MHz TXCO provides the on chip differential reference frequency.

An external differential reference signal can be connected between REFIN+ and REFIN– edge mount connectors. Configure the board by removing R1, R62, R63, and inserting 0  $\Omega$  links in place of R2 and R68. To assure 50  $\Omega$  input impedance, populate R3 and R67 with 50  $\Omega$  resistors.

To use a single-ended TCXO, configure the board by replacing Y1, with Y1(ALT), remove R62, R63, C11 and insert 0  $\Omega$  links for R3 and R78.

A single-ended external signal generator can be connected to REFIN+ edge-mounted SMA connector. Configure the board by removing R1, R62, R63 and insert 0  $\Omega$  links in places of R3 and R68. To adjust impedance matching of the evaluation board to the external reference source, R67 can be populated with a 50  $\Omega$  resistor.

### OUTPUT SIGNALS

The VCO output is available at the edge-mount SMA connector, VCO\_I/O. The [ADF4155](#) differential RF<sub>OUT+</sub> and RF<sub>OUT–</sub> pins are available at the RFOUT+ and RFOUT– edge mount SMA connectors.

### DEFAULT OPERATION SETTINGS

All components necessary for LO generation are inserted on the board. This board is shipped with the [ADF4155](#) synthesizer, a differential 122.88 MHz reference TCXO, a fourth-order 80 kHz loop filter ( $I_{CP} = 0.9$  mA), and a VCO with a 5725 MHz to 5875 MHz frequency range.

## EVALUATION BOARD SOFTWARE

The control software for the EVAL-ADF4151EB1Z accompanies the board on the CD included in the evaluation kit. To install the software, see the [UG-476](#) user guide.

### MAIN CONTROLS

The **Main Controls** tab selects the RF and user configurable register settings. Consult the register description of the [ADF4155](#) data sheet for details.

In the **RF Settings** area, the **VCO RF Frequency** should equal the VCO frequency. The reference frequency should be the same as the applied reference signal. The PFD frequency is calculated from the reference frequency, the R-counter, the reference doubler, and the reference-divide-by-2. Ensure that the value in the **PFD Frequency** box matches the value specified in the loop filter design.

In the **Register 4** area, program the **Charge pump current** to the value for which the loop filter was designed.

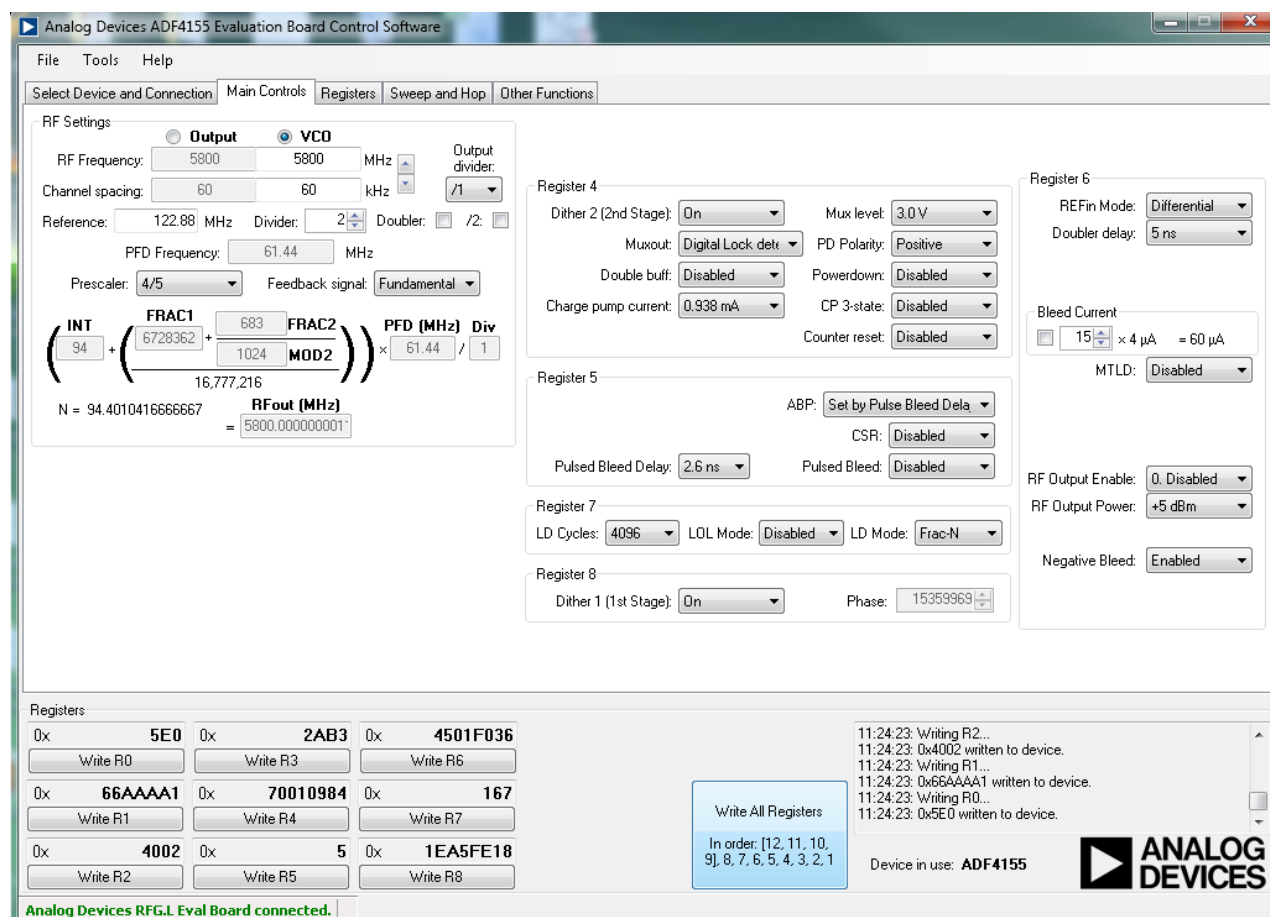

Figure 3. Software Front Panel Display—Main Controls

## EVALUATION AND TEST

To evaluate and test the performance of the ADF4155, use the following procedure:

1. Install the ADF4155 software (see the UG-476 user guide).
2. Connect the EV-ADF4155EB1Z board to the PC.
3. Follow the hardware driver installation procedure (Windows XP only).
4. Connect 50  $\Omega$  terminators to RFOUT+ and RFOUT-.
5. Connect the power supply to the banana connectors (5.5 V).
6. Run the ADF4155 software.
7. Select **USB board (green)** and ADF4155 in the **Select Device and Connection** tab of the software front panel display window.
8. Click the **Main Controls** tab. Click **Write All Registers**.
9. Connect the spectrum analyzer to the SMA connector VCO\_I/O. Refer to Figure 6 for a typical evaluation setup.
10. Measure the output spectrum. Note that default settings are for a VCO frequency of 5.8 GHz.
11. Figure 4 shows a phase noise plot of the SMA VCO\_I/O,  $VCO_{OUT} = 5800$  MHz.
12. Figure 5 shows a phase noise plot of the SMA  $RF_{OUT+}$ ,  $RF_{OUT+}/RF_{OUT-} = 2900$  MHz. To configure the EV-ADF4155EB1Z for this plot, use the following steps:
  - Set the output divider in the RF settings to 2.
  - Enable the RF output in Register 6.
  - Remove the 50  $\Omega$  terminators from SMA RFOUT+ and connect to SMA VCO\_I/O.

Figure 5.  $RF_{OUT+}$  Phase Noise, RF Divider = Two Enabled, Fractional-N,  $RF_{OUT+}/RF_{OUT-} = 2900$  MHz, (Integer Boundary Spur at 12.32 MHz and the Second Harmonic Integer Boundary Spur 26.64 MHz Visible)

Figure 4. Fractional-N Phase Noise and Spur Performance,  $VCO_{I/O}$ ,  $VCO_{OUT} = 5800$  MHz

## NOTES

I<sup>2</sup>C refers to a communications protocol originally developed by Philips Semiconductors (now NXP Semiconductors).

**ESD Caution**

**ESD (electrostatic discharge) sensitive device.** Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

**Legal Terms and Conditions**

By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. **CONFIDENTIALITY.** This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. **ADDITIONAL RESTRICTIONS.** Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. **TERMINATION.** ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. **LIMITATION OF LIABILITY.** THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND WITH RESPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPRESS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES RESULTING FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). **EXPORT.** Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. **GOVERNING LAW.** This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
