

## ISL85003EVAL2Z, ISL85003AEVAL2Z

**Evaluation Board User Guide** 

AN1930 Rev.1.00 Aug 28, 2014

## **Description**

The ISL85003 and ISL85003A kits are intended for use for point-of-load applications sourcing from 4.5V to 18V. The kits are used to demonstrate the performance of the ISL85003 and ISL85003A, low quiescent current high efficiency synchronous buck regulators.

The ISL85003 and ISL85003A are offered in a 4x3mm dual flat no lead (DFN) package.

# **Specifications**

The boards are designed to operate at the following operating conditions:

- Input voltage range from 4.5V to 18V
- Resistor programmable output voltage from 0.8V, ±1%
- · Up to 3A output current
- · Current mode control
  - DCM/CCM
  - Internal or external compensation options
  - 500kHz switching frequency option
  - External synchronization up to 2MHz on ISL85003
- · Adjustable soft-start time on the ISL85003A
- Operating junction temperature range: -40°C to +125°C

# **Quick Setup Guide**

- Ensure that the circuit is correctly connected to the supply and loads prior to applying any power.
- 2. Connect the bias supply to VIN, the plus terminal to VIN (P4) and the negative return to PGND (P5).
- Connect the output load to V0, the plus terminal to V0 (P8) and the negative return to PGND (P9).
- 4. Verify that the position is PWM or PFM for SW2.
- 5. Verify that the position is ON for SW1.
- 6. Turn on the power supply.
- 7. Verify the output voltage is 5V for VO.

# **Recommended Equipment**

The following materials are recommended to perform testing:

- 0V to 25V power supply with at least 10A source current capability
- Electronic loads capable of sinking current up to 7A
- · Digital multimeters (DMMs)
- 100MHz quad-trace oscilloscope
- · Signal generator

## **Key Board Features**

- · Small, compact design
- . Switch selectable EN (enabled/disabled)
- Switch selectable MODE (auto-DCM/forced-PWM)
- · Connectors and test points for easy probing

## References

## **Ordering Information**

PART NUMBER	DESCRIPTION		
ISL85003EVAL2Z	Evaluation Board for ISL85003FRZ and ISL85003AFRZ		

# **Evaluating the Other Output Voltage**

The ISL85003 and ISL85003A kit outputs are preset to 5V for V<sub>OUT</sub>; however, the output voltages are programmed using an external resistor divider that scales the feedback relative to the internal reference voltage. The output voltage programming resistor, R<sub>2</sub>, will depend on the value chosen for the feedback resistor, R<sub>1</sub>, and the desired regulator output voltage, V<sub>OUT</sub>. The value for the feedback resistor R<sub>1</sub> is typically between  $10\text{k}\Omega$  and  $400\text{k}\Omega$ , as shown in Equation 1.

$$R_2 = \frac{R_1 \cdot 0.8V}{V_{OUT} - 0.8V}$$
 (EQ. 1)

If the output voltage desired is 0.8V, then  $R_2$  is left unpopulated.  $R_1$  is still required to set the low frequency pole of the modulator compensation.

#### **Switch Control**

The ISL85003 and ISL85003A evaluation boards contain SW1 and SW2 for various controls of the ISL85003 and ISL85003A circuitries. Table 1 details this function.

**TABLE 1. SWITCH SETTINGS** 

SW1	ENABLE	FUNCTION				
1	OFF	Disable V0				
3	ON	Enable V0				
SW2	MODE	FUNCTION				
1	DCM	Force DCM				
3	PWM	Fixed PWM frequency at light load				

Page 1 of 6

# **Components Selection**

V <sub>OUT</sub>	0.8V	<b>1</b> V	1.2V	1.5V	1.8V	2.5V	3.3V	5V
c <sub>1</sub> , c <sub>2</sub>	<b>1</b> 0μ <b>F</b>	<b>1</b> 0μ <b>F</b>	<b>1</b> 0μ <b>F</b>	<b>1</b> 0μ <b>F</b>	<b>1</b> 0μF	<b>1</b> 0μ <b>F</b>	<b>1</b> 0μF	<b>1</b> 0μ <b>F</b>
C <sub>5</sub>	22μF	22µF	22μF	47µF	47μF	47µF	47µF	47µF
c <sub>6</sub>	22μF	22µF	22µF	22µF	22µF	22µF	22µF	22µF
C <sub>4</sub>	Open	Open	Open	4.7pF	4.7pF	4.7pF	4.7pF	4.7pF
L <sub>1</sub>	1.8µH	2.2µH	2.2µH	3.3µH	3.3µH	3.3µH	4.7µH	4.7µH
R <sub>1</sub>	301kΩ	301kΩ	301kΩ	301kΩ	301kΩ	301kΩ	301kΩ	301kΩ
R <sub>2</sub>	Open	1.2ΜΩ	604kΩ	344kΩ	241kΩ	142kΩ	96.3kΩ	57.6kΩ

NOTE:  $V_{IN} = 12V$ ,  $I_{OUT} = 3A$ ; The components selection table is a suggestion for typical application using internal compensation mode. For applications that require high output capacitance greater than  $200\mu F$ ,  $R_1$  should be adjusted to maintain a loop response bandwidth about 40kHz.

#### Notice

- 1. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation or any other use of the circuits, software, and information in the design of your product or system, Renesas Electronics disclaims any and all liability for any losses and damages incurred by you or third parties arising from the use of these circuits, software, or information
- 2. Renesas Electronics hereby expressly disclaims any warranties against and liability for infringement or any other claims involving patents, copyrights, or other intellectual property rights of third parties, by or arising from the use of Renesas Electronics products or technical information described in this document, including but not limited to, the product data, drawings, charts, programs, algorithms, and application
- 3. No license, express, implied or otherwise, is granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
- 4. You shall not alter, modify, copy, or reverse engineer any Renesas Electronics product, whether in whole or in part. Renesas Electronics disclaims any and all liability for any losses or damages incurred by you or third parties arising from such alteration, modification, copying or reverse engineering.
- Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The intended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below.
  - "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; industrial robots; etc.

"High Quality": Transportation equipment (automobiles, trains, ships, etc.); traffic control (traffic lights); large-scale communication equipment; key financial terminal systems; safety control equipment; etc. Unless expressly designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not intended or authorized for use in products or systems that may pose a direct threat to human life or bodily injury (artificial life support devices or systems; surgical implantations; etc.), or may cause serious property damage (space system; undersea repeaters; nuclear power control systems; aircraft control systems; key plant systems; military equipment; etc.). Renesas Electronics disclaims any and all liability for any damages or losses incurred by you or any third parties arising from the use of any Renesas Electronics product that is inconsistent with any Renesas Electronics data sheet, user's manual or

- 6. When using Renesas Electronics products, refer to the latest product information (data sheets, user's manuals, application notes, "General Notes for Handling and Using Semiconductor Devices" in the reliability handbook, etc.), and ensure that usage conditions are within the ranges specified by Renesas Electronics with respect to maximum ratings, operating power supply voltage range, heat dissipation characteristics, installation, etc. Renesas Electronics disclaims any and all liability for any malfunctions, failure or accident arising out of the use of Renesas Electronics products outside of such specified
- 7. Although Renesas Electronics endeavors to improve the quality and reliability of Renesas Electronics products, semiconductor products have specific characteristics, such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Unless designated as a high reliability product or a product for harsh environments in a Renesas Electronics data sheet or other Renesas Electronics document, Renesas Electronics products are not subject to radiation resistance design. You are responsible for implementing safety measures to guard against the possibility of bodily injury, injury or damage caused by fire, and/or danger to the public in the event of a failure or malfunction of Renesas Electronics products, such as safety design for hardware and software, including but not limited to redundancy, fire control and malfunction prevention, appropriate treatment for aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult and impractical, you are responsible for evaluating the safety of the final products or systems manufactured by you.
- e contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. You are responsible for carefully and sufficiently investigating applicable laws and regulations that regulate the inclusion or use of controlled substances, including without limitation, the EU RoHS Directive, and using Renesas Electronics products in compliance with all these applicable laws and regulations. Renesas Electronics disclaims any and all liability for damages or losses occurring as a result of your noncompliance with applicable laws and regulations.
- 9. Renesas Electronics products and technologies shall not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations. You shall comply with any applicable export control laws and regulations promulgated and administered by the governments of any countries asserting jurisdiction over the parties or
- 10. It is the responsibility of the buyer or distributor of Renesas Electronics products, or any other party who distributes, disposes of, or otherwise sells or transfers the product to a third party, to notify such third party in advance of the contents and conditions set forth in this document.
- 11. This document shall not be reprinted, reproduced or duplicated in any form, in whole or in part, without prior written consent of Renesas Electronics
- 12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products
- (Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its directly or indirectly controlled subsidiaries
- (Note 2) "Renesas Electronics product(s)" means any product developed or manufactured by or for Renesas Electronics.
