

# OVM9724 720p HD CameraCubeChip™ product brief

## Industry's Most Compact Front-Facing HD Camera for Smartphones, Tablets, Notebooks and Ultrabooks

available in  
a lead-free  
package

OmniVision's ultra-compact OVM9724 CameraCubeChip™ captures 720p high definition (HD) video at 30 frames per second (fps) in an industry-leading miniaturized module of 3.9 x 2.9 x 2.3 mm. Because the OVM9724 CameraCubeChip is a reflowable all-in-one camera drop-in solution, the need for additional components is eliminated and manufacturing is significantly streamlined.

The low-power 1/9-inch OVM9724 utilizes OmniVision's powerful OmniBSI+™ pixel architecture to enable high quality color images and fast frame 720p HD video at 30 fps or cropped VGA at 60 fps. This combination of

high-performance and small form factor allows HD cameras to be integrated into ultra-slim, narrow-bezel devices, making it an attractive solution for next generation smartphones, tablets, notebooks and Ultrabooks™.

The OVM9724 provides full-frame, sub sampled or windowed 8- and 10-bit images. All required image processing functions, including exposure control and defective pixel cancelling are programmable through the serial camera control bus (SCCB) interface.
