Specifications:

Installation Flexibility... Orienting an antenna for optimal energy radiation is especially crucial when the antenna is indoors or on the outside of a building, and many obstacles to its path exist. To compliment its diverse line of Whisper and Terrace Diversity directional antenna products, Centurion offers an array of mounting hardware to ensure the best possible antenna performance. A variety of brackets and other mounting components give complete control over the angle and tilt of the antenna. Centurion's mounting hardware is available in plastic, metal, and steel to meet the environmental demands of your indoor or outdoor antenna.

Model #	Part #	Description	Goes with Antenna:
IMI-02A	CAF94147	2" Indoor Pan/Tilt Mount	ID1900
