

SMD Network Thick Film

Type MCN Series

Type MCN Series

The MCN is an innovative chip resistor network which combines a series of inline isolated 0402 or 0603 resistors into one package. Obvious savings in board space and number of placements are possible by specifying our resistor network packages. The package layer design prevents tombstoning when reflow soldering the chips. Supplied on 8mm tape.

How to Order MCNT4

Common Part	Element Size	Resistance Value	Tolerance
MCNT4 - 4 Resistors Concave MCNY4 - 4 Resistors Convex	1E - 0402 1J - 0603	The first two digits are significant figures of resistance value. The third denotes the number of zeros following. e.g. 1K: 102 50K - 503 100K - 104	F $\pm 1\%$ J $\pm 5\%$ * * Standard

N.B. Take care when using these resistors close to the specified power ratings at the heat generated by a network is greater than that of equivalent individual chip resistors separately placed.
