Flush Mount

SPECIFICATIONS

- ✦ 316L SS
- ✦ Flush Diaphragm
- ✦ 0 - 100mV Output
- ✦ Absolute and Gage
- ✦ Temperature Compensated

The 85 Flush Mount is a small profile, media compatible, piezoresistive silicon pressure sensor packaged in a 316L stainless steel housing. The 85 Flush Mount is designed for o-ring mounting where the diaphragm must not be shrouded by a weld ring or fitting.

The sensing package utilizes silicon oil to transfer pressure from the 316L stainless steel diaphragm to the sensing element. A ceramic substrate is attached to the package that contains laser-trimmed resistors for temperature compensation and offset correction. An additional laser trimmed resistor is included which can be used to adjust an external differential amplifier and provide span interchangeability to within $\pm 1\%$.

FEATURES

- ◆ O-Ring Flush Mount

Notes

1. For amplified output circuits, 3.012V ± % interchangeability with gain set resistor. See Application Schematic.
2. Measured at vacuum for Absolute (A), ambient for Gage (G).
3. Best fit straight line.
4. Over the compensated temperature range with respect to 25°C.
5. Guarantees output/input ratiometricity.
6. Load resistance to reduce measurement errors due to output loading.
7. Between case and sensing element.
8. The maximum pressure that can be applied without changing the transducer's performance or accuracy.
9. The maximum pressure that can be applied to a transducer without rupture of either the sensing element or transducer.
10. Maximum temperature range for product with standard cable and connector is -20°C to +105°C.
