A1	REVISED DWG PER ECO-17-004936	A.REY
A2	REVISED NOTE 7 PER ECO-17-008496	A.REY

MATERIALS:

1. INSULATION SLEEVE: HEAT-SHRINKABLE, TRANSPARENT BLUE, RADIATION CROSS-LINKED, MODIFIED POLYVINYLIDENE FLOURIDE.
2. MELTABLE SEALING RINGS: MODIFIED THERMOPLASTIC.
3. SEAMLESS STUB SPLICER: BASE METAL: COPPER ALLOY 101 OR 102 PER ASTM B-75.
PLATING: NICKEL PER QQ-N-290. / COLOR CODE: SEE TABLE BELOW.

1. APPLICATION

1. These parts are designed to provide an immersion resistant stub splice made with wires having insulations rated for at least 135°C.
2. Part will seal assemblies which require insertion of not more than two wires per hole of the inserts. If two wires are inserted through one hole, they must be of the same gauge size.
3. Recovered dimensions of the insulation sleeve: I.D: 3.18 (0.125) Max. / Wall: 0.33 (0.013) Min.

INSTALLATION PROCEDURE:

1. Pass wires to be crimped through the holes of the multi-holed insert (NOT MORE THE TWO WIRES THROUGH ANY HOLE). Care must be taken to avoid twisting of the wires as this will prevent proper positioning of the sleeve.
2. Strip wires 7.94 to 8.73 (5/16" to 11/32")
3. Insert wires into crimp splicer leaving a gap of 0.79 (1/32") between the wire insulation and the barrel.
4. Crimp using a Raychem AD-1377 Crimp Tool or equivalent.
5. Slide sleeve as close as possible to the crimp barrel. Hold sleeve in this position by squeezing the wires directly behind it.
6. Apply heat as follows using TE Connectivity recommended heating tools listed in Table 1 below:
 - a. Center assembly in the reflector well long enough to cause the center section of the sleeve to recover and lock itself in place.
 - b. Move assembly to position the top (major wire entry end) in the hot air stream. Hold in this position until insert has completely melted and flowed axially along the wires.
 - c. Apply heat to bottom of the sleeve until insert melts and flows.
 - d. The total time required to install the sealing sleeve is dependant upon the air-stream temperature and mass of the crimped assembly being encapsulated.

7. TE Connectivity RECOMMENDED HEATING TOOLS:
