

Safety Standard Recognized, ERP610 Series, Encapsulated, X1 760 VAC/Y1 500 VAC (Industrial Grade)

Overview

KEMET's ERO610 series encapsulated radial leaded ceramic disc capacitors are specifically designed for interference-suppression AC line filtering applications. Having internationally recognized safety certifications, these capacitors are well-suited for applications that require keeping potentially disruptive or damaging line transients and EMI out of susceptible equipment. They are also an ideal solution when needing to suppress line disturbances at the source.

Safety Certified Capacitors are classified as either X and/or Y capacitors. Class X capacitors are primarily used in line-to-line (across-the-line) applications. In this application there is no danger of electric shock to humans should the capacitor fail, but could result in a risk of fire. The class Y capacitor is primarily used in line-to-ground (line by-pass) applications. In this application, failure of the capacitor could lead to danger of electric shock.

With a working voltage of 760 VAC in line-to-line (Class X) and 500 VAC in line-to-ground (Class Y) applications, these safety capacitors meet the impulse test criteria outlined in IEC Standard 60384. Meeting subclass X1 and Y1 requirements, these devices are certified to withstand impulses up to 4 KV (X1) and 8 KV (Y1) respectively. These encapsulated devices also meet the flame test requirements outlined in UL Standard 94V-0.

Ordering Information

ERP610	W	102	M	DF0
Ceramic Series	Voltage Rating (Safety Subclass Rating)	Capacitance Code (pF)	Capacitance Tolerance	Lead configuration / Packaging Code
ERP610	W = X1 760 VAC/Y1 500 VAC	Two significant digits and Number of zeroes	K = $\pm 10\%$ M = $\pm 20\%$	*See Packaging Options

Packaging C-Spec Ordering Options Tables

Bulk Packaging ¹				
	LEAD LENGTH L	LEAD DIAMETER D	LEAD SPACING F	
			10 mm	12.5 mm
Straight leads	30 mm - 3 mm	0.6 mm	DF0	EF0
		0.8 mm	DJ0	EJ0
	10 mm ± 1 mm	0.6 mm	DD0	ED0
		0.8 mm	DH0	EH0
6 mm - 1 mm	0.6 mm/0.8 mm	DB0	EB0	
Preformed leads inside crimp	30 mm - 3 mm	0.6 mm		EFG
		0.8 mm		EJG
Preformed leads outside crimp	5 mm ± 1 mm	0.6 mm	TE0	TG0
		0.8 mm	TF0	TH0
Preformed leads snap-in	Minimum 2.8 mm	0.6 mm		QG0
	Minimum 3.5 mm	0.8 mm		QH0
Inline wire	Minimum 2.8 mm + 1.5 mm	0.6 mm	YE0	YG0
	Minimum 3.0 mm + 2.0 mm	0.8 mm	YF0	YH0

¹ 5 mm and 7 mm lead spacing options are not available for ERP610 Series.

Reel Packaging Component Pitch 25.4 mm ¹			
		TAPING F	
		10 mm	12.5 mm
Lead spacing F			
Body diameter D		All diameters	
Straight leads	H = 16.5 mm	DRT	ERT
	H = 18.0 mm	DRU	ERU
	H = 20.0 mm	DRY	ERY
Preformed leads inside crimp	H0 = 16.0 mm	-	ERZ
Preformed leads outside crimp	H0 = 16.0 mm	TDR	TER
Inline wire	H0 = 16.0 mm	YRD	YRE

¹ 5 mm and 7 mm lead spacing options are not available for ERP610 Series.

Benefits

- Safety Standard Recognized (IEC 60384-14)
- Reliable operation up to 125°C
- Class X1/Y1
- 10 mm and 12.5 mm lead spacing
- RoHS compliant
- Capacitance offerings ranging from 33 pF up to 4.7 nF
- Available capacitance tolerances of $\pm 10\%$ and $\pm 20\%$
- High reliability
- Preformed (crimped) or straight lead configurations
- Non-polar device, minimizing installation concerns
- Encapsulation meets flammability standard UL 94V-0

Applications

Typical applications include line-to-Line (Class X) filtering, line to-ground (Class Y) filtering, antenna coupling, primary and secondary coupling (switching power supplies) and line disturbances suppression (motors and motor controls, relays, switching power supplies and invertors).

Approval Standard and Certification Number

Safety Standard	Specification	Certificate Number
VDE	EN 132400	40001993, 40001996
UL CAN/CSA	UL 60384-14 and E60384-14	E356389

These devices are VDE/ENEC recognized for antenna coupling and AC line-to-line (Class X) and line-to-ground (Class Y) applications per IEC60384-14.

Environmental Compliance

These devices are RoHS Compliant. They meet all requirements set forth by both EU and China RoHS directives.

Lead Configurations

Straight Leads		Inside Kink		Outside Kink	
Φd	0.6 or 0.8	Φd	0.6 or 0.8	Φd	0.6 0.6 or 0.8
L	30 - 3 or 10 ± 1	F	7.5 10 12.5	F	5.0 7.5 7.5 10.0 12.5

General Specifications/Performance Characteristics

Dielectric/Temperature Characteristic	U2J	Y5S	Y5T	Y5U
Operating Temperature Range:	-40°C to +125°C			
Capacitance Change with Reference to +25°C and 0 VDC Applied (TCC):	-750 ±120 ppm/°C	±22%	+22%/-33%	22%/-56%
Test Voltage Between Terminals	Component test: 4,000 VAC, 50 Hz, 2 seconds As repeated test admissible only once with 4,000 VAC, 50 Hz, 60 seconds Random sampling test (destructive test): 4,000 VAC, 50 Hz, 60 seconds			
Dielectric Strength of Body Insulation	4,000 VAC, 50 Hz, 60 seconds (destructive test)			
¹ Dissipation Factor (tanδ) at +25°C ¹	0.50%	2.50%		
Insulation Resistance (IR) Limit at +25°C	10,000 MΩ Minimum (500 VDC applied for 60±5 seconds at 25°C)			

*C = Nominal capacitance

¹ Capacitance and Dissipation Factor (DF) measured under the following conditions:

U2J: 1 MHz ± 100 kHz and 1.0 ±0.2 Vrms

Y5S, Y5T and Y5U: 1 kHz ± 50 Hz and 1.0 ±0.2 Vrms

Note: When measuring capacitance, it is important to ensure the set voltage level is held constant. The HP4284 & Agilent E4980 have a feature known as Automatic Level Control (ALC). The ALC feature should be switched to "ON."

Soldering and Mounting Information

Soldering Specifications		
	Solderability	Resistance to Soldering Heat
Soldering Temperature	235°C ± 5°C	260°C ± 5°C
Solder Duration	2 seconds ± 0.5 seconds	10 seconds ± 1.0 seconds
Distance from component body	≥ 2 mm	≥ 5 mm
CSA (cUL recognition)	C 22.2 No. 1-M90 (Ur=250 VAC)	216038

Soldering test for capacitors with wire leads: (according to IEC 60068-2-20, solder bath method)

Soldering Recommendations

When soldering this product to a PCB/PWB, do not exceed the solder heat resistance specification of the capacitor. Subjecting this product to excessive heating could reflow the solder joint between the lead and ceramic element and/or may result in thermal shocks that can crack the ceramic element.

Cleaning Recommendations

The components should be cleaned immediately following the soldering operation with vapor degreasers.

Marking

¹ EVOX RIFA and all associated products were acquired by KEMET in 2007. The EVOX RIFA trademark is still used on the capacitor marking.

Disclaimer

All product specifications, statements, information and data (collectively, the "Information") in this datasheet are subject to change. The customer is responsible for checking and verifying the extent to which the Information contained in this publication is applicable to an order at the time the order is placed.

All Information given herein is believed to be accurate and reliable, but it is presented without guarantee, warranty, or responsibility of any kind, expressed or implied.

Statements of suitability for certain applications are based on KEMET Electronics Corporation's ("KEMET") knowledge of typical operating conditions for such applications, but are not intended to constitute – and KEMET specifically disclaims – any warranty concerning suitability for a specific customer application or use. The Information is intended for use only by customers who have the requisite experience and capability to determine the correct products for their application. Any technical advice inferred from this Information or otherwise provided by KEMET with reference to the use of KEMET's products is given gratis, and KEMET assumes no obligation or liability for the advice given or results obtained.

Although KEMET designs and manufactures its products to the most stringent quality and safety standards, given the current state of the art, isolated component failures may still occur. Accordingly, customer applications which require a high degree of reliability or safety should employ suitable designs or other safeguards (such as installation of protective circuitry or redundancies) in order to ensure that the failure of an electrical component does not result in a risk of personal injury or property damage.

Although all product-related warnings, cautions and notes must be observed, the customer should not assume that all safety measures are indicated or that other measures may not be required.
