

Is Now Part of

ON Semiconductor®

**To learn more about ON Semiconductor, please visit our website at
www.onsemi.com**

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (_), the underscore (_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at www.onsemi.com. Please email any questions regarding the system integration to Fairchild_questions@onsemi.com.

ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using ON Semiconductor products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by ON Semiconductor. "Typical" parameters which may be provided in ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. ON Semiconductor does not convey any license under its patent rights nor the rights of others. ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold ON Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the part. ON Semiconductor is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.

74VHC161284 IEEE 1284 Transceiver

General Description

The VHC161284 contains eight bidirectional data buffers and eleven control/status buffers to implement a full IEEE 1284 compliant interface. The device supports the IEEE 1284 standard and is intended to be used in Extended Capabilities Port mode (ECP). The pinout allows for easy connection from the Peripheral (A-side) to the Host (cable side).

Outputs on the cable side can be configured to be either open drain or high drive (± 14 mA). The pull-up and pull-down series termination resistance of these outputs on the cable side is optimized to drive an external cable. In addition, all inputs (except HLH) and outputs on the cable side contain internal pull-up resistors connected to the V_{CC} supply to provide proper termination and pull-ups for open drain mode.

Outputs on the Peripheral side are standard LOW-drive CMOS outputs. The DIR input controls data flow on the A_1 – A_8 / B_1 – B_8 transceiver pins.

Features

- Supports IEEE 1284 Level 1 and Level 2 signaling standards for bidirectional parallel communications between personal computers and printing peripherals
- Replaces the function of two (2) 74ACT1284 devices
- All inputs have hysteresis to provide noise margin
- B and Y output resistance optimized to drive external cable
- B and Y outputs in high impedance mode during power down
- Inputs and outputs on cable side have internal pull-up resistors
- Flow-through pin configuration allows easy interface between the Peripheral and Host

Ordering Code:

Ordering Number	Package Number	Package Description
74VHC161284MEA	MS48A	48-Lead Small Shrink Outline Package (SSOP), JEDEC MO-118, 0.300" Wide
74VHC161284MTD	MTD48	48-Lead Thin Shrink Small Outline Package (TSSOP), JEDEC MO-153, 6.1mm Wide

Surface mount packages are also available on Tape and Reel. Specify by appending the suffix letter "X" to the ordering code.

RP	Maximum Pull-Up Resistance	B ₁ –B ₈ , Y ₉ –Y ₁₃ , C ₁₄ –C ₁₇	5.0	1650	Ω	
	Minimum Pull-Up Resistance	B ₁ –B ₈ , Y ₉ –Y ₁₃ , C ₁₄ –C ₁₇	5.0	1150	Ω	
I _{IH}	Maximum Input Current in HIGH State	A ₉ –A ₁₃ , PLH _{IN} , HD, DIR, HLH _{IN}	5.5	1.0	μA	V _I = 5.5V
		C ₁₄ –C ₁₇	5.5	100		V _I = 5.5V
I _{IL}	Maximum Input Current in LOW State	A ₉ –A ₁₃ , PLH _{IN} , HD, DIR, HLH _{IN}	5.5	–1.0	μA	V _I = 0.0V
		C ₁₄ –C ₁₇	5.5	–5.0	mA	V _I = 0.0V
I _{OZH}	Maximum Output Disable Current (HIGH)	A ₁ –A ₈	5.5	20	μA	V _O = 5.5V
		B ₁ –B ₈	5.5	100		V _O = 5.5V
I _{OZL}	Maximum Output Disable Current (LOW)	A ₁ –A ₈	5.5	–20	μA	V _O = 0.0V
		B ₁ –B ₈	5.5	–5.0	mA	
I _{OFF}	Power Down Output Leakage	B ₁ –B ₈ , Y ₉ –Y ₁₃ , PLH	0.0	100	μA	V _O = 5.5V
I _{OFF}	Power Down Input Leakage	C ₁₄ –C ₁₇ , HLH _{IN}	0.0	100	μA	V _I = 5.5V
I _{OFF} – I _{CC}	Power Down Leakage to V _{CC}		0.0	250	μA	(Note 7)
I _{CC}	Maximum Supply Current		5.5	70	mA	V _I = V _{CC} or GND

Note 5: Output impedance is measured with the output active LOW and active HIGH (HD = HIGH).

Note 6: This parameter is guaranteed but not tested, characterized only.

Note 7: Power-down leakage to V_{CC} is tested by simultaneously forcing all pins on the cable-side (B₁–B₈, Y₉–Y₁₃, PLH, C₁₄–C₁₇ and HLH_{IN}) to 5.5V and measuring the resulting I_{CC}.

LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF FAIRCHILD SEMICONDUCTOR CORPORATION. As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
2. A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
