

# 1.27mm Pitch Multi-function Two Piece Connectors

## FX2 Series

Stacking connection (Stack height : 12~16mm)

Horizontal Connection

Vertical Connection

Fig.1

## Features

### 1. Various connection with various product line

### 2. Easy One-Touch Operation

The ribbon cable connection type allows easy one-touch operation with either single hand.

Insertion and Extraction

(1) Pick internal locks with thumb and the index finger.

Fig.2

(2) With unique and preferable click feeling, the cable and connector can be inserted or withdrawn.

Fig.3

(For insertion, the operation proceeds from procedure (2) to (1).)

### 3. Board to board type

① Prevents flux penetration

The straight through hole type takes the complete flux tight action from the board back side at solder dipping. The type is prepared, corresponding to whether or not cleaning is required.

② Stack height 12mm to 16mm

The board stack height can be set to every 1 mm step up to 12 to 16mm.

③ Mis-insertion preventive mechanism

The mating area is designed in a mechanism so as to prevent mis-insertion, and complete countermeasures have been taken against wrenching.

### 4. Board to cable type

① Positive lock with easy operation

Employing the inner lock system, positive lock and eject actions can be performed with easy operation.

② Applicable cable

The applicable cable is the <UL2651>28 AWG flat cable (7/0.127mm), and the jacket size is 0.9±0.1mm.

### 5. SMT type

#### Robust design with metal hold-down

The right angle type is equipped with metal hold-down to secure soldering strength, and constructed so as to fix by screws. The straight type can choose whether or not metal hold-down are required.

## Product Specifications

Rating	Current rating 0.5A	Operating Temperature Range -55°C to +85°C (Note 1)	Storage Temperature Range -10°C to +60°C(Note 2)
	Voltage rating 125V AC		Operating Humidity Range 40 to 80%
			Storage Humidity Range 40 to 70%(Note 2)

Item	Specification	Condition	
1. Insulation Resistance	1000MΩ min	250V DC	
2. Withstanding Voltage	No flashover or insulation breakdown.	300V AC/1 min	
3. Contact Resistance	45mΩ max.	100mA	
4. Vibration	No electrical discontinuity of 1μs or more	Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 directions.	
5. Humidity (Steady state)	Contact resistance: 55mΩ max. Insulation resistance: 100MΩ min.	96 hours at temperature of 40°C and humidity of 90% to 95%	
6. Temperature Cycle	Contact resistance: 55mΩ max. Insulation resistance: 100MΩ min. No damage, cracks, or parts looseness.	(-55°C: 30 minutes→15 to 35°C: 2 to 3 minutes→85°C: 30 minutes→15 to 35°C: 2 to 3 minutes) 5 cycles	
7. Durability (Mating/un-mating)	Contact resistance: 55mΩ max.	500 cycles	
8. Resistance to soldering heat	No deformation of components affecting performance.	SMT Type	Reflow: At the recommended temperature profile Manual soldering: 360°C for 5 seconds
		DIP Type	Solder bath: 260°C for 10 seconds Manual soldering: 360°C for 5 seconds

Note 1 : Includes temperature rise caused by current flow.

Note 2 : The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non conducting condition of installed connectors in storage, shipment or during transportation.

Note 1 : The permissible gap when male and female connectors are mated together shall be within 1.0 mm. However, the gap shall be within 0.4 mm for the assemblies indicated with "\*1."

Note 2 : For the assemblies indicated with "\*2," there may be a gap of 0.6 mm created between the mating surfaces as shown in the figure below but it is acceptable for use.

Note 3 : Please be sure to secure the PCB with screws after mounted.

## ◆ How to use the connector

### 1. Selection of connectors

- ① FX2 Series connectors are designed to prevent flux creep-up in the soldering operation of straight type products, and the user needs to select from either non-cleaning types (FX2C-\* and FX2B-\*) or cleaning types (FX2CA-\* and FX2BA-\*). Please make sure to clean the right-angle types (FX2-\* and FX2B-\*). When cleaning them, be sure to use clean liquids.
- ② When using a socket cable type, the user needs to select a locked type if a load is applied on vibration/impact, or the cable. Additionally, please be sure to use cabler clamps when a load is applied on the cable.

### 2. The process of temporary tacking on the PCB

Please use the types equipped with temporary tacking pins when a temporary tacking process is required for mounting on the PCB. (Qualified thickness of the PCB :  $t=1.6\pm 0.1$ )

(Precaution) : In order to prevent damage to the dip post when it is mounted on the PCB, conduct the inserting operation while keeping the PCB and the connectors parallel to one another while the temporary tacking pin is pushed in after the dip post has been guided into the through hole of the PCB.

### 3. Mating Side Tolerance Clearance

(Example) In the case of FX2C- $\overline{DP}$ -1.27DSA and FX2C- $\overline{DS}$ -1.27DSA\*P-1.27DSA and FX2C-\*S-1.27DSA

The permissible gap when a male and a female connectors are mated together shall be within 1 mm. (excluding locked cable types)

### 4. Indtructions for using locked cable types

- ① When mating connectors, please insert them to the end so that there is no gap in-between.
- ② When pulling out a connector, please be sure to pull it out after turning in the lock levers on both sides. If you pull out the connector while turning in only the lever on one side, the connector could be damaged.
- ③ Please make sure that the lock lever will not be open to the outside.

## 5. Temperature profile for mounting SMT type connectors (reference)

### <Applicable conditions>

Reflow method : Reflow together with far infrared ray and hot air (SENSBEY NR-II)

Environment in the reflow furnace : Ambient air

Solder : Cream type (Sn-3Ag-0.5Cu)  
(Flux contained amount: 11 Wt%)  
(M705-221CM5-42-10.5 manufactured by Senju Metal Industry Co., Ltd.)

PCB : Size 110 x 40 x 1.6 mm  
Material: Glass epoxy

Metal mask thickness : 0.2 mm (straight type)  
0.15 mm (right-angled type)

Note 1 : This temperature profile shows recommended values. Temperature should be measured on the top of the connector.

Note 2 : The number of reflow processes should be twice or less.

Note 3 : Impacts due to the type and manufacture of solder cream, PCB size, and other mounting materials, etc, may differ depending on the conditions. Please be sure to confirm the mounting conditions before use.

\* When using a 0.15 mm metal mask for the straight type connectors, please contact our technology center for recommended apertures.

## 6. Dimensions between the PCBs for SMT type connectors

The gap between the PCBs for male and female connectors shown in the applications does not include the solder cream thickness. Therefore, please take into account the thickness of the solder cream so that it is added to the gap between the PCBs after mounting the connectors.
