RELV4-16

DALI Bus Power Supply

Description

The RELV4-16 is designed to power a DALI digital lighting control bus. This low cost AC/DC power supply is fully compliant with the IEC62386 DALI standard, so can be used with any DALI-certified product or controller. The output is current limited to 200mA, sufficient to power a complete DALI zone with up to 64 addressable DALI devices. The universal input voltage range from 90V to 264VAC enables the RELV4-16 to be used anywhere in the world. Due to its compact design with mounting tabs, it can be easily and conveniently integrated into any DALI network. An indicator LED shows Power OK and DALI bus traffic to aid installation and commissioning. The RELV4-16 comes with a 5 year warranty.
