Product Overview

This product is the board to convert the 14-pin connector of the E8a (or the E8) emulator to the 10-pin connector.

When using this product, make sure that the pin assignment of the target system is the same as the following connector pin assignment. It can be used only when the pin assignment of the 10-pin connector-side is the same.

E8a (or the E8) emulator software and Flash development Toolkit can be used for this product.
