
2.8 V - 500 mA, 6 MHz synchronous step-down converter based on ST1S15J28R

Data brief

**Description**

STEVAL-ISA131V2 is an evaluation board designed around the ST1S15, a high efficiency miniaturized step-down converter able to provide 500 mA output current from an input voltage of 2.3 V to 5.5 V. This converter working at 6 MHz switching frequency and is specifically designed for applications where high efficiency and small application area are the key factors.

Features

- 85% typical efficiency
- 500 mA output current capability
- 45 μ A typical quiescent current
- PFM or PWM operation for best efficiency over whole load range
- Ultra-fast load and line transient
- Short-circuit and thermal protection
- Tiny external components
- Auto or forced PWM selection with dedicated pin
- ST1S15J28R in Flip Chip 6 bumps Package
- RoHS compliant
