

## DESCRIPTION

Demonstration circuit 1195 features the LTM<sup>®</sup>8023, a step-down regulator preconfigured to deliver 3.3V at up to 2A from a 5V to 36V input supply. The LTM8023 is a step-down converter, so minimum amount of headroom is required to keep the output in regulation. In addition, the input voltage required to turn on is higher than that required to run (see Minimum Input Voltage section in the data sheet for detail). The optional Burst Mode<sup>®</sup> operation of LTM8023 supports high efficiency and low output ripple at light load conditions.

The LTM8023 data sheet gives a complete description of the part, operation and application information. The LTM8023 data sheet must be read in conjunction with this manual to operate or modify demo circuit 1195.

**Design files for this circuit board are available at <http://www.linear.com/demo>**

## PERFORMANCE SUMMARY (T<sub>A</sub> = 25°C)

PARAMETER	CONDITION	VALUE
Input Voltage Range		5V (Note 1) to 36V
Output Voltage V <sub>OUT</sub>		3.3V
Maximum Output Current		2A
Typical Switching Frequency		600kHz

**Note 1:** The circuit requires more than 5V to run at full load. See Figure 1 and the data sheet for detail.

## QUICK START PROCEDURE

Demonstration circuit 1195 is a simple way to evaluate the performance of the LTM8023. Refer to Figure 2 and Figure 3 for proper measurement equipment setup and follow the procedure below:

NOTE. When measuring the input or output voltage ripple, care must be taken to avoid a long ground lead on the oscilloscope probe. Measure the input or output voltage ripple by touching the probe tip directly across the  $V_{IN}$  or  $V_{OUT}$  and GND terminals. See Figure 3 for proper scope probe technique.

1. Place JP1 on the ON position.
2. With power off, connect the input power supply to  $V_{IN}$  and GND.

3. Turn on the power at the input. The output voltage should rise to 3.3V.
4. Once the proper output voltage is established, adjust the load within the operating range and observe the output voltage regulation, ripple voltage, efficiency and other parameters.

Figure 1. Load Current vs Input Voltage ( $3.3V_{OUT}$ )

**SCHEMATIC DIAGRAM**

This circuit is proprietary to Linear Technology and supplied for use with Linear Technology parts.  
**Customer Notice:** Linear Technology has made a best effort to design a circuit that meets customer-supplied specifications; however, it remains the customer's responsibility to verify proper and reliable operation in the actual application. Component substitution and printed circuit board layout may significantly affect circuit performance or reliability. Contact Linear Applications Engineering for assistance.

## DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. **THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.**

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No License is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

**Please read the DEMO BOARD manual prior to handling the product.** Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.
