MAAM-011163

75 Ω, Differential RF Amplifier
5 - 1218 MHz

Rev. V5

Features

- Single Stage, Differential Amplifier
- 5 V, 290 mA Operation
- 19 dB Flat Gain
- Low Noise
- Low Distortion Performance
- Configurable as a single stage TIA for optical applications
- ESD Class 1B for HBM
- Lead-Free SOIC-8EP Plastic Package
- Halogen-Free "Green" Mold Compound
- RoHS* Compliant

Description

The MAAM-011163 is high gain, high linearity and low noise differential RF amplifier assembled in a SOIC-8EP plastic package. This amplifier provides 19 dB of flat gain with very low noise figure. The differential push-pull topology provides superior 2nd order intermodulation performance.

The MAAM-011163 provides high gain, low noise and low distortion making it ideally suited for 75 Ω infrastructure applications.

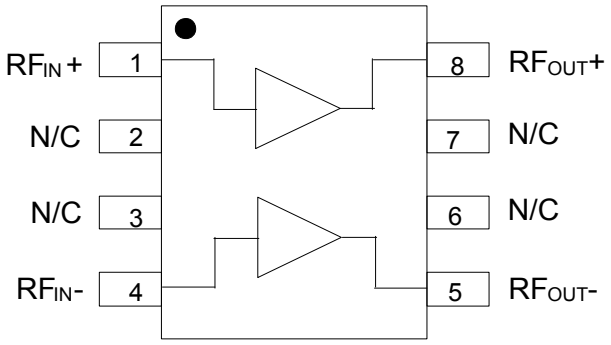
The MAAM-011163 can be configured with input from a photo diode for optical receiver applications. Having a typical EIN of 3.5pA/√ Hz and excellent output return loss. While having high gain of 23 dB typical.

Ordering Information[1,2]

Part Number	Package
MAAM-011163	Bulk Packaging
MAAM-011163-TR1000	1000 piece reel
MAAM-011163-TR3000	3000 piece reel
MAAM-01163-001SMB	Sample Board, 45 - 1218 MHz
MAAM-01163-002SMB	Sample Board, 5 - 300 MHz

1. Reference Application Note M513 for reel size information.
2. All sample boards include 5 loose parts.

Functional Schematic



Pin Configuration

Pin #	Pin Name	Function
1	RF_{IN}+	RF Input +
2	N/C	No Connection
3	N/C	No Connection
4	RF_{IN}-	RF Input -
5	RF_{OUT}-	RF Output - / V_{DD}
6	N/C	No Connection
7	N/C	No Connection
8	RF_{OUT}+	RF Output + / V_{DD}
9	Pad[3]	RF and DC Ground

3. The exposed pad centered on package bottom must be connected to RF and DC ground.

* Restrictions on Hazardous Substances, European Union Directive 2011/65/EU.

75 Ω, Differential RF Amplifier
5 - 1218 MHz

Electrical Specifications: T_A = 25°C, V_{DD} = 5 V, Z_0 = 75 Ω

Performance specified with input/output balun MABA-009210-CT1760.

Parameter	Test Conditions	Units	Min.	Typ.	Max.

Absolute Maximum Ratings[4,5,6]

Parameter	Absolute Maximum
Input Power	10 dBm
Operating Voltage	8 V
Operating Temperature	-40°C to +85°C
Storage Temperature	-65°C to +150°C
Junction Temperature[7]	150°C

4. Exceeding any one or combination of these limits may cause permanent damage to this device.
5. MACOM does not recommend sustained operation near these survivability limits.
6. Operating at nominal conditions with T_J <150°C will ensure MTTF > 1 x 10^6 hours.
7. Junction Temperature (T_J) = Case Temperature (T_C) + Θ_{JC}*(V*I)
   Typical thermal resistance (Θ_{JC}) = 29°C/W.
   a) For T_C = 25°C,
   T_J = 67°C @ 5V, 290 mA
   b) For T_C = 85°C,
   T_J = 127°C @ 5 V, 290 mA

Handling Procedures

Please observe the following precautions to avoid damage:

Static Sensitivity

Integrated Circuits are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these (HBM) Class 1B devices.

Applications Section: 5 - 300 MHz Application

The MAAM-011163 may be tuned for operation in the 5 - 300 MHz band for CATV reverse path (upstream) applications using an alternate balun and other external tuning components as identified in the table below. The recommended PCB layout and schematic are the same as identified on page 3. This tune can also be used from 5MHz up to 1200MHz, making it the ideal circuit for full duplex applications.

Recommended PCB Layout for Upstream
