

# Ceramic Filters (CERAFIL®)/ Ceramic Discriminators for Communications Equipment

### **EU RoHS Compliant**

- All the products in this catalog comply with EU RoHS.
- EU RoHS is "the European Directive 2011/65/EU on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment."
- For more details, please refer to our website 'Murata's Approach for EU RoHS' (<http://www.murata.com/info/rohs.html>).

● Part Numbering

Ceramic Filters (CERAFIL®) for IF

① Product ID

② Oscillating/Element

| Product ID | Oscillating/Element                   |
|------------|---------------------------------------|
| CF         | U 4 Elements Area Expansion mode      |
|            | W 6 Elements Area Expansion mode      |
| SF         | P 4 Elements Area Expansion mode      |
|            | E 2 Elements Thickness Expansion mode |
|            | S 2 Elements Thickness Shear mode     |

③ Structure/Size

| Code  | Structure/Size |
|-------|----------------|
| C□/K□ | Chip Type      |
| L□    | Lead Type      |

□ is "A" or subsequent code, which indicates the size. It varies depending on vibration mode and number of elements.  
 Chip type is only applied for SF series.

④ Nominal Center Frequency

Expressed by four-digit alphanumerics. The unit is hertz (Hz). If the unit is "kHz", it is expressed by three figures plus "K." If the unit is "MHz", a decimal point is expressed by the capital letter "M."

⑤ Product Specification

| Code | Product Specification   |
|------|---|
| D4A  | Three-digit alphanumerics express pass bandwidth, center frequency tolerance and design type. |

SFE/S/J series are expressed by four-digit alphanumerics.

⑥ Individual Specification

| Code | Individual Specification Code           |
|------|---|
| 001  | Expressed by three-digit alphanumerics. |

SFE/S/J series are expressed by two-digit alphanumerics.

With standard type, ⑥ is omitted.

⑦ Packaging

| Code | Packaging               |
|------|-------------------------|
| -B0  | Bulk                    |
| -R0  | Embossed Taping ø=180mm |
| -R1  | Embossed Taping ø=330mm |

Embossed taping is applied to chip type.

### Ceramic Discriminators for IF (kHz)

(Part Number) 

|    |   |    |      |   |   |   |    |     |
|----|---|----|------|---|---|---|----|-----|
| CD | B | LB | 450K | C | A | X | 16 | -B0 |
| ①  | ② | ③  | ④    | ⑤ | ⑥ | ⑦ | ⑧  | ⑨   |

#### ① Product ID

| Product ID |                        |
|------------|------------------------|
| CD         | Ceramic Discriminators |

#### ② Oscillating

| Code | Oscillating         |
|------|---------------------|
| B    | Area Expansion mode |

#### ③ Structure/Size

| Code  | Structure/Size |
|-------|----------------|
| C□/K□ | Chip Type      |
| L□    | Lead Type      |

□ is "A" or subsequent code, which indicates the size. It varies depending on vibration mode and number of elements.

#### ④ Nominal Center Frequency

Expressed by four-digit alphanumerics. The unit is in hertz (Hz). Capital letter "K" following three figures expresses the unit of "kHz."

#### ⑤ Detection

| Code | Detection            |
|------|----------------------|
| C    | Quadrature Detection |

#### ⑥ Application

| Code | Application           |
|------|-----------------------|
| A    | Standard              |
| L    | Application with coil |

#### ⑦ Element Type

| Code | Element Type     |
|------|------------------|
| X    | Low-capacitance  |
| Y    | High-capacitance |

#### ⑧ IC

| Code | IC                         |
|------|----------------------------|
| 16   | Applicable IC Control code |

#### ⑨ Packaging

| Code | Packaging                           |
|------|-------------------------------------|
| -B0  | Bulk                                |
| -R0  | Embossed Taping $\phi=180\text{mm}$ |
| -R1  | Embossed Taping $\phi=330\text{mm}$ |

Embossed taping is applied to chip type. With non-standard products, one letter indicating "Individual Specification" is added between "⑧ Applicable IC" and "⑨ Package Specification code."

### Ceramic Discriminators for IF (MHz)

(Part Number) 

|    |   |    |      |    |     |     |
|----|---|----|------|----|-----|-----|
| CD | S | CB | 10M7 | GF | 001 | -R0 |
| ①  | ② | ③  | ④    | ⑤  | ⑥   | ⑦   |

#### ① Product ID

| Product ID |                |
|------------|----------------|
| CD         | Discriminators |

#### ② Oscillation

| Code | Oscillation          |
|------|----------------------|
| S    | Thickness Shear mode |

#### ③ Structure/Size

| Code | Structure/Size |
|------|----------------|
| C□   | Chip Type      |

□ is expressed "A" or subsequent code, which indicates the size.

#### ④ Nominal Center Frequency

Expressed by four-digit alphanumerics. The unit is in hertz (MHz). Decimal point is expressed by capital letter "M."

#### ⑤ Product Specification

| Code | Product Specification  |
|------|--|
| GF   | Two-digit alphanumerics express type, center frequency, rank, others |

#### ⑥ IC

| Code | IC                         |
|------|----------------------------|
| 001  | Applicable IC Control Code |

#### ⑦ Packaging

| Code | Packaging                           |
|------|-------------------------------------|
| -R0  | Embossed Taping $\phi=180\text{mm}$ |

With non-standard products, an alphanumerics indicating "Individual Specification" is added between "⑥ IC" and "⑦ Packaging."

# Ceramic Filters (CERAFIL®) for Communications Equipment

## CERAFIL® kHz SMD Type SFPKA Series

The SFPKA series is comprised of small, high-performance, economical, thin (5.0mm) filters consisting of 4 ceramic elements. Their innovative construction is perfect for shrinking mobile communication products such as cordless phones, pagers and transceivers.

### ■ Features

1. The filters are mountable by automatic placers.
2. The filters can be reflow soldered and withstand washing.
3. They are slim, at only 5.0mm maximum thickness.
4. The bandwidth ranges from D to H.
5. Operating temperature range: -20 to +80 (°C)  
 Storage temperature range: -40 to +85 (°C)

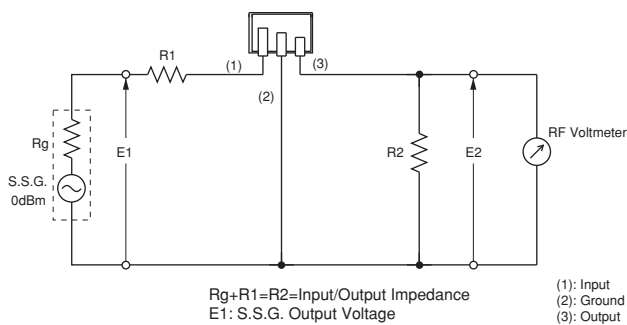

| Part Number     | Center Frequency (fo) (kHz) | 6dB Bandwidth (kHz) | Stop Bandwidth (kHz)       | Stop Band Attenuation (dB) | Insertion Loss (dB)              | Ripple (dB)               | Input/Output Impedance (ohm) |
|-----------------|-----------------------------|---------------------|----------------------------|----------------------------|----------------------------------|---------------------------|------------------------------|
| SFPKA455KD4A-R1 | 455 ±1.5kHz                 | fn±10.0 min.        | fn±20.0 max. [within 40dB] | 27 min. [within fn±100kHz] | 4.0 max. [at minimum loss point] | 2.0 max. [within fn±7kHz] | 1500                         |
| SFPKA455KE4A-R1 | 455 ±1.5kHz                 | fn±7.5 min.         | fn±15.0 max. [within 40dB] | 27 min. [within fn±100kHz] | 6.0 max. [at minimum loss point] | 1.5 max. [within fn±5kHz] | 1500                         |
| SFPKA455KF4A-R1 | 455 ±1.5kHz                 | fn±6.0 min.         | fn±12.5 max. [within 40dB] | 27 min. [within fn±100kHz] | 6.0 max. [at minimum loss point] | 1.5 max. [within fn±4kHz] | 1500                         |
| SFPKA455KG1A-R1 | 455 ±1.0kHz                 | fn±4.5 min.         | fn±10.0 max. [within 40dB] | 25 min. [within fn±100kHz] | 6.0 max. [at minimum loss point] | 1.5 max. [within fn±3kHz] | 1500                         |
| SFPKA455KH1A-R1 | 455 ±1.0kHz                 | fn±3.0 min.         | fn±9.0 max. [within 40dB]  | 35 min. [within fn±100kHz] | 6.0 max. [at minimum loss point] | 1.5 max. [within fn±2kHz] | 2000                         |

Center frequency (fo) defined by the center of 6dB bandwidth.  
 (fn) means nominal center frequency 455kHz.

For safety purposes, connect the output of filters to the IF amplifier through a DC blocking capacitor. Avoid applying a direct current to the output of ceramic filters.  
 The order quantity should be an integral multiple of the "Minimum Quantity" shown in package page in this catalog.

# Ceramic Filters (CERAFIL®) for Communications Equipment

## CERAFIL® kHz SMD Type CFUKG Series

The CFUKG series is comprised of small, high-performance, thin (4.0mm) filters consisting of 4 ceramic elements. Their innovative construction is perfect for shrinking mobile communication products such as pocket pagers and cellular phones.

### ■ Features

1. The filters are mountable by automatic placers.
2. The filters can be reflow soldered and withstand washing.
3. They are slim, at only 4.0mm maximum thickness, and have a small mounting area (7.5x6.0mm) enabling flexible PCB design.
4. The bandwidth ranges from D to G.
5. Operating temperature range: -20 to +80 (°C)  
 Storage temperature range: -40 to +85 (°C)

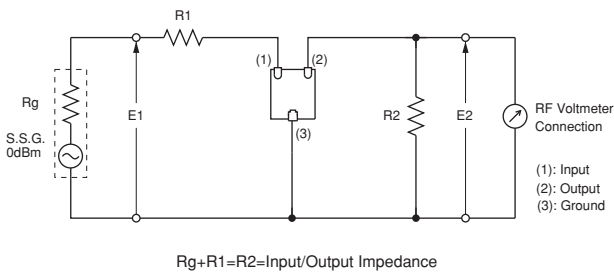

| Part Number            | Center Frequency (fo) (kHz) | 6dB Bandwidth (kHz) | Stop Bandwidth (kHz)       | Stop Band Attenuation (dB) | Insertion Loss (dB)              | Ripple (dB)               | Input/Output Impedance (ohm) |

Center frequency (fo) defined by the center of 6dB bandwidth.  
 (fn) means nominal center frequency 455kHz.

For safety purposes, connect the output of filters to the IF amplifier through a DC blocking capacitor. Avoid applying a direct current to the output of ceramic filters.  
 The order quantity should be an integral multiple of the "Minimum Quantity" shown in package page in this catalog.

# Ceramic Filters (CERAFIL®) for Communications Equipment

## CERAFIL® kHz SMD Type CFUKG\_X Series

The CFUKG\_X series is comprised of small, high-performance, thin (4.0mm) filters consisting of 4 ceramic elements.

The filters exhibit an extremely flat GDT characteristic combined with a narrow bandwidth. The filters are recommended for narrow band digital communication applications.

### ■ Features

1. The filters are mountable by automatic placers.
2. The filters can be reflow soldered and withstand washing.
3. They are slim, at only 4.0mm maximum thickness, and have a small mounting area (7.5x6.0mm) enabling flexible PCB design.
4. The bandwidth ranges from E to H.
5. Operating temperature range: -20 to +80 (°C)  
 Storage temperature range: -40 to +85 (°C)

## kHz SMD Type CERAFIL® Notice

### ■ SFPKA/CFUKG/CFUKF Series Notice

#### ● Soldering and Mounting

##### 1. Standard Reflow Soldering Conditions

###### (1) Reflow

Filter is soldered twice within the following temperature conditions.

###### (2) Soldering Iron

Electrode is directly soldered with the tip of soldering iron at  $+350\pm 5^{\circ}\text{C}$  for  $3.0\pm 0.5$  seconds.

###### (3) Other

Do not use strong acidity flux, more than 0.2wt% chlorine content, in reflow soldering.

##### 2. Wash

###### (1) Cleaning Solvent

CFC alternatives (HCFC Series), Isopropyl Alcohol (IPA), Water (Demineralized Water), Cleaning Water Solution (Cleanthrough-750H, Pine Alpha 100S), Silicon (Technocare FRW)

###### (2) Cleaning Conditions

- Immersion Wash  
2 minutes max. in above solvent at  $+60^{\circ}\text{C}$  max.
- Shower or Rinse Wash  
2 minutes max. in above solvent at  $+60^{\circ}\text{C}$  max.

###### (3) Notice

- When components are immersed in solvent, be sure to maintain the temperature of components below the temperature of solvent.
- Please do not use ultrasonic cleaning.
- Total washing time should be 4 minutes maximum.
- Please ensure the component is thoroughly evaluated in your application circuit.
- Please do not use chlorine, petroleum or alkali cleaning solvent.
- If you plan to use any other types of solvents, please consult with Murata or Murata representative prior to using.

##### 3. Coating

In case of overcoating the component, conditions such as material of resin, cure temperature, and so on should be evaluated well.

Continued on the following page.

## kHz SMD Type CERAFIL® Notice

☐ Continued from the preceding page.

### ● Storage and Operating Conditions

#### 1. Product Storage Condition

Please store the products in a room where the temperature/humidity is stable, and avoid such places where there are large temperature changes. Please store the products under the following conditions:

Temperature: -10 to +40°C

Humidity: 15 to 85% R.H.

#### 2. Expiration Date on Storage

Expiration date (shelf life) of the products is six months after delivery under the conditions of a sealed and unopened package. Please use the products within six months after delivery. If you store the products for a long time (more than six months), use carefully because solderability may be degraded due to storage under poor conditions.

Please confirm solderability and characteristics for the products regularly.

#### 3. Notice on Product Storage

(1) Please do not store the products in a chemical atmosphere (Acids, Alkali, Bases, Organic gas, Sulfides and so on), because the characteristics may be reduced in quality and may be degraded in solderability due to storage in a chemical atmosphere.

- (2) Please do not put the products directly on the floor without anything under them to avoid damp places and/or dusty places.
- (3) Please do not store the products in places such as a damp heated place or any place exposed to direct sunlight or excessive vibration.
- (4) Please use the products immediately after the package is opened, because the characteristics may be reduced in quality and/or be degraded in solderability due to storage under poor condition.
- (5) Please do not drop the products to avoid cracking of ceramic element.

#### 4. Other

Please be sure to consult with our sales representative or engineer whenever the products are to be used in conditions not listed above.

### ● Rating

The component may be damaged if excessive mechanical stress is applied.

### ● Handling

1. If the component is cleaned, please confirm that the reliability has not been degraded.
2. The components, packed in a moisture-proof bag (dry pack), are sensitive to moisture. The following treatment is required before applying reflow soldering, to avoid package cracks or reliability degradation caused by thermal stress. When unpacked, store the component in an atmosphere of below 25°C and below 65%R.H., and solder within 48 hours.

3. For safety purposes, connect the output of filters to the IF amplifier through a D.C. blocking capacitor. Avoid applying a direct current to the output of ceramic filters.

## kHz SMD Type CERAFIL® Notice

### ■ CFWKA Series Notice

#### ● Soldering and Mounting

##### 1. Standard Reflow Soldering Conditions

###### (1) Reflow

Filter is soldered twice within the following temperature conditions.

###### (2) Soldering Iron

Electrode is directly soldered with the tip of soldering iron at  $+350 \pm 5^\circ\text{C}$  for  $3.0 \pm 0.5$  seconds.

###### (3) Other

Do not use strong acidity flux, more than 0.2wt% chlorine content, in reflow soldering.

##### 2. Wash

Do not clean or wash the component as it is not hermetically sealed.

##### 3. Coating

Do not apply conformal coating onto the component as it's not hermetically sealed.

#### ● Storage and Operating Conditions

##### 1. Product Storage Condition

Please store the products in a room where the temperature/humidity is stable, and avoid places where there are large temperature changes. Please store the products under the following conditions:

Temperature:  $-10$  to  $+40^\circ\text{C}$

Humidity: 15 to 85% R.H.

##### 2. Expiration Date on Storage

Expiration date (shelf life) of the products is six months after delivery under the conditions of a sealed and unopened package. Please use the products within six months after delivery. If you store the products for a long time (more than six months), use carefully because the solderability may be degraded due to storage under poor conditions.

Please confirm solderability and characteristics for the products regularly.

##### 3. Notice on Product Storage

(1) Please do not store the products in a chemical atmosphere (Acids, Alkali, Bases, Organic gas,

Sulfides and so on), because the characteristics may be reduced in quality and may be degraded in solderability due to storage in a chemical atmosphere.

# Ceramic Filters (CERAFIL®) for Communications Equipment

## CERAFIL® MHz SMD Type SFECF10M7 Series

SFECF10M7 series for FM receivers are small, high-performance and super thin (1.4mm max.) filters. The piezoelectric element is sandwiched by the ceramics substrate.

They have 1.4mm max. thickness and a small mounting area (3.45x3.1mm).

SFECF series and CDSCB series (MHz Discriminator) enable customers to make VICS/RKE/TPMS set very thin and small.

### ■ Features

1. The filters are mountable by automatic placers.
2. They are slim, at only 1.4mm max. thickness, and have a small mounting area (3.45x3.1mm) enabling flexible PCB design.
3. Various bandwidths are available. Select a suitable type in accordance with the desired selectivity.
4. Operating Temperature Range:
  - 20 to +80 (°C)(Standard Type)
  - 40 to +85 (°C)(High-reliability Type)
 Storage Temperature Range:
  - 40 to +85 (°C)(Standard Type)
  - 55 to +85 (°C)(High-reliability Type)

Area of Attenuation: [within 20dB]

Area of Insertion Loss: at minimum loss point Area of Ripple: within 3dB B.W.

Center frequency (fo) defined by center of 3dB bandwidth.

For safety purposes, connect the output of filters to the IF amplifier through a DC blocking capacitor. Avoid applying a direct current to the output of ceramic filters.

The order quantity should be an integral multiple of the "Minimum Quantity" shown in package page in this catalog.

 (3)(4): No connect  
 (6): Output

### Frequency Characteristics

# Ceramic Filters (CERAFIL®) for Communications Equipment

## CERAFIL® MHz SMD Type SFSCE10M7 Series

SFSCE series are chip surface mount filters available for 3dB bandwidth at 700kHz to 1.3MHz. (more than twice width compared with current types)  
 They have 1.0mm max. thickness and small mounting area (4.5x3.8mm).

### ■ Features

1. The filters are mountable by automatic placers.
2. They are slim, at only 1.0mm max. thickness, and have a small mounting area (4.5x3.8mm) enabling flexible PCB design.
3. Available lead (Pb) free solder reflow.
4. Operating temperature range:  
 -20 to +80 (°C)  
 Storage temperature range:  
 -40 to +85 (°C)

### ■ Applications

1. SS digital communication system
2. Digital wireless audio
3. PHS Evolution system
4. RFID Reader Writer
5. RKE

| Part Number      | Nominal Center Frequency (fn) (MHz) | 3dB Bandwidth (kHz) | Stop Bandwidth (MHz)           | Insertion Loss (dB)              | Ripple (dB)                     | Spurious Response (dB)                           | GDT Deviation (µs)          | Input/Output Impedance (ohm) |
|------------------|-------------------------------------|---------------------|--------------------------------|----------------------------------|---------------------------------|--|-----------------------------|------------------------------|
| SFSCE10M7WF03-R0 | 10.700                              | fn±500.0 min.       | 2.2 max. (Total) [within 20dB] | 6.0 max. [at minimum loss point] | 2.0 max. [within 3dB Bandwidth] | 30/25 min. [within 5.7MHz to fn / fn to 15.7MHz] | 0.6 max. [within fn±400kHz] | 470                          |
| SFSCE10M7WF04-R0 | 10.700                              | fn±400.0 min.       | 1.8 max. (Total) [within 20dB] | 6.0 max. [at minimum loss point] | 1.5 max. [within 3dB Bandwidth] | 35/25 min. [within 5.7MHz to fn / fn to 15.7MHz] | 0.6 max. [within fn±325kHz] | 470                          |
| SFSCE10M7WF05-R0 | 10.700                              | fn±325.0 min.       | 1.7 max. (Total) [within 20dB] | 6.0 max. [at minimum loss point] | 1.5 max. [within 3dB Bandwidth] | 40/30 min. [within 5.7MHz to fn / fn to 15.7MHz] | 0.6 max. [within fn±250kHz] | 470                          |

For safety purposes, connect the output of filters to the IF amplifier through a DC blocking capacitor. Avoid applying a direct current to the output of ceramic filters.  
 The order quantity should be an integral multiple of the "Minimum Quantity" shown in package page in this catalog.

#### ● Soldering and Mounting

##### 1. Standard Reflow Soldering Conditions

###### (1) Reflow

Filter is soldered twice within the following temperature conditions.

###### (2) Soldering Iron

Filter is soldered at  $+350\pm 5^{\circ}\text{C}$  for  $3.0\pm 0.5$  seconds. The soldering iron should not touch the filter while soldering.

###### (3) Condition for Placement Machines

The component is recommended with placement machines that employ optical placement capabilities. The component might be damaged by excessive mechanical force. Please make sure that you have evaluated by using placement machines before going into mass production. Do not use placement machines that utilize mechanical positioning. Please contact Murata for details beforehand.

###### (4) Other

- The component may be damaged if excess mechanical stress is applied to it mounted on the printed circuit board.
- Design layout of components on the PC board to minimize the stress imposed on the warp or flexure of the board.
- After installing components, if solder is excessively applied to the circuit board, mechanical stress will cause destruction resistance characteristics to degrade. To prevent this, be extremely careful in determining shape and dimension before designing the circuit board diagram.
- When the positioning claws and pick-up nozzle are worn, the load is applied to the components while positioning is concentrated on positioning accuracy, etc. Careful checking and maintenance are necessary to prevent unexpected trouble.
- When correcting components with a soldering iron, the tip of the soldering iron should not directly touch the component. Depending on the soldering conditions, the effective area of terminations may be reduced. Solder containing Ag should be used to prevent the electrode erosion.
- Do not use strong acidity flux, more than 0.2wt% chlorine content, in reflow soldering.

## MHz SMD Type CERAFIL<sup>®</sup> Notice

☐ Continued from the preceding page.

### 2. Wash

Do not clean or wash the component as it is not hermetically sealed.

### 3. Coating

In case of overcoating the component, conditions such as material of resin, cure temperature, and so on should be evaluated well.

## ● Storage and Operating Conditions

### 1. Product Storage Condition

Please store the products in a room where the temperature/humidity is stable, and avoid places where there are large temperature changes. Please store the products under the following conditions:

Temperature: -10 to +40°C

Humidity: 15 to 85% R.H.

### 2. Expiration Date on Storage

Expiration date (shelf life) of the products is six months after delivery under the conditions of a sealed and unopened package. Please use the products within six months after delivery. If you store the products for a long time (more than six months), use carefully because solderability may be degraded due to storage under poor conditions.

Please confirm solderability and characteristics for the products regularly.

### 3. Notice on Product Storage

(1) Please do not store the products in a chemical atmosphere (Acids, Alkali, Bases, Organic gas, Sulfides and so on), because the characteristics may be reduced in quality and may be degraded in solderability due to storage in a chemical atmosphere.

- (2) Please do not put the products directly on the floor without anything under them to avoid damp places and/or dusty places.
- (3) Please do not store the products in places such as a damp heated place or any place exposed to direct sunlight or excessive vibration.
- (4) Please use the products immediately after the package is opened, because the characteristics may be reduced in quality and/or be degraded in solderability due to storage under poor condition.
- (5) Please do not drop the products to avoid cracking of ceramic element.

### 4. Other

Please be sure to consult with our sales representative or engineer whenever the products are to be used in conditions not listed above.

## ● Rating

The component may be damaged if excessive mechanical stress is applied.

## ● Handling

- 1. Accurate test circuit values are required to measure electrical characteristics. Miscorrelation may be caused if there is any deviation, especially stray capacitance, from the test circuit in the specification.
- 2. The components, packed in a moisture proof bag (dry pack), are sensitive to moisture. The following treatment is required before applying reflow soldering, to avoid reliability degradation caused by thermal stress. When unpacked, store the component in an atmosphere of reflow 30°C and below 60%R.H., and solder within 1 week.

- 3. For safety purposes, connect the output of filters to the IF amplifier through a D.C. blocking capacitor. Avoid applying a direct current to the output of ceramic filters.

# Ceramic Filters (CERAFIL®) for Communications Equipment

## CERAFIL® Plastic Case General Use CFULA Series

CFULA series are high selectivity ceramic filters, which consist of 4 ceramic elements connected in a ladder form.

They are most suitable for digital communications and cellular phones because of their improved GDT characteristics.

### ■ Features

1. High selectivity
2. A variety of bandwidths available
3. Excellent GDT characteristics are available within pass bandwidth.
4. Easily mounted on a printed circuit board
5. Operating temperature range: -20 to +80 (°C)  
Storage temperature range: -40 to +85 (°C)

| Part Number     | Center Frequency (fo) (kHz) | 6dB Bandwidth (kHz) | Stop Bandwidth (kHz)       | Stop Band Attenuation (dB) | Insertion Loss (dB)              | Input/Output Impedance (ohm) |
|-----------------|-----------------------------|---------------------|----------------------------|----------------------------|----------------------------------|------------------------------|
| CFULA455KB2A-B0 | 455 ±2.0kHz                 | fn±15.0 min.        | fn±30.0 max. [within 40dB] | 27 min. [within fn±100kHz] | 4.0 max. [at minimum loss point] | 1500                         |
| CFULA455KC2A-B0 | 455 ±2.0kHz                 | fn±12.5 min.        | fn±24.0 max. [within 40dB] | 27 min. [within fn±100kHz] | 4.0 max. [at minimum loss point] | 1500                         |
| CFULA455KD4A-B0 | 455 ±1.5kHz                 | fn±10.0 min.        | fn±20.0 max. [within 40dB] | 27 min. [within fn±100kHz] | 4.0 max. [at minimum loss point] | 1500                         |
| CFULA455KE4A-B0 | 455 ±1.5kHz                 | fn±7.5 min.         | fn±15.0 max. [within 40dB] | 27 min. [within fn±100kHz] | 6.0 max. [at minimum loss point] | 1500                         |
| CFULA455KF4A-B0 | 455 ±1.5kHz                 | fn±6.0 min.         | fn±12.5 max. [within 40dB] | 27 min. [within fn±100kHz] | 6.0 max. [at minimum loss point] | 2000                         |
| CFULA455KG1A-B0 | 455 ±1.0kHz                 | fn±4.5 min.         | fn±10.0 max. [within 40dB] | 25 min. [within fn±100kHz] | 6.0 max. [at minimum loss point] | 2000                         |
| CFULA455KH1A-B0 | 455 ±1.0kHz                 | fn±3.0 min.         | fn±9.0 max. [within 40dB]  | 35 min. [within fn±100kHz] | 6.0 max. [at minimum loss point] | 2000                         |

Center frequency (fo) defined by the center of 6dB bandwidth.  
 (fn) means nominal center frequency 455kHz.

For safety purposes, connect the output of filters to the IF amplifier through a DC blocking capacitor. Avoid applying a direct current to the output of ceramic filters.  
 The order quantity should be an integral multiple of the "Minimum Quantity" shown in package page in this catalog.

# Ceramic Filters (CERAFIL®) for Communications Equipment

## CERAFIL® Plastic Case General Use CFWLA Series

Ceramic filter CFWLA series are low profile high selectivity ceramic filters, which use 6 elements in ladder form.

They are best suitable to high-class transceivers, cordless telephones and amateur radios.

### ■ Features

1. Low profile, high selectivity
2. Available bandwidths are B to J as standard
3. Easily mountable on any PC board
4. Operating temperature range: -20 to +80 (°C)  
 Storage temperature range: -40 to +85 (°C)

| Part Number     | Nominal Center Frequency (fn) (kHz) | 6dB Bandwidth (kHz) | Stop Bandwidth (kHz)       | Stop Band Attenuation (dB) | Insertion Loss (dB)              | Ripple (dB)                 | Input/Output Impedance (ohm) |

Center frequency (fo) defined by the center of 6dB bandwidth.  
 (fn) means nominal center frequency 455kHz.

For safety purposes, connect the output of filters to the IF amplifier through a DC blocking capacitor. Avoid applying a direct current to the output of ceramic filters.  
 The order quantity should be an integral multiple of the "Minimum Quantity" shown in package page in this catalog.

■ Frequency Characteristics

# Ceramic Filters (CERAFIL®) for Communications Equipment

## CERAFIL® Plastic Case Group Delay Flat Type Miniaturized Type CFULB\_Y Series

Ceramic filter CFULB\_Y series are miniature and high-performance filters. These filters, only 6.3mm high, are 65% the volume of conventional types. Well suited for miniaturizing communications equipment, especially for a cellular phone.

### ■ Features

1. Miniature, flat GDT characteristics
2. Suitable for a cellular phone
3. A variety of bandwidths are available.
4. Operating temperature range: -20 to +80 (°C)  
 Storage temperature range: -40 to +85 (°C)

| CFWLA Series | 150  |
| CFWLB Series | 150  |

The order quantity should be an integral multiple of the "Minimum Quantity" shown above.

(pcs.)

### ■ Notice

#### ● Soldering and Mounting

The component cannot withstand washing.

#### ● Storage and Operating Conditions

##### 1. Product Storage Condition

Please store the products in a room where the temperature/humidity is stable, and avoid places where there are large temperature changes. Please store the products under the following conditions:

Temperature: -10 to +40°C

Humidity: 15 to 85% R.H.

##### 2. Expiration Date on Storage

Expiration date (shelf life) of the products is six months after delivery under the conditions of a sealed and unopened package. Please use the products within six months after delivery. If you store the products for a long time (more than six months), use carefully because solderability may be degraded due to storage under poor conditions.

Please confirm solderability and characteristics for the products regularly.

##### 3. Notice on Product Storage

(1) Please do not store the products in a chemical atmosphere (Acids, Alkali, Bases, Organic gas, Sulfides and so on), because the characteristics may be reduced in quality and may be degraded in solderability due to storage in a chemical atmosphere.

(2) Please do not put the products directly on the floor without anything under them to avoid damp places and/or dusty places.

(3) Please do not store the products in places such as a damp heated place or any place exposed to direct sunlight or excessive vibration.

(4) Please use the products immediately after the package is opened, because the characteristics may be reduced in quality and/or be degraded in solderability due to storage under poor condition.

(5) Please do not drop the products to avoid cracking of ceramic element.

##### 4. Other

Please be sure to consult with our sales representative or engineer whenever the products are to be used in conditions not listed above.

#### ● Rating

The component may be damaged if excessive mechanical stress is applied.

#### ● Handling

1. Do not use this product with bend. The component may be damaged if excessive mechanical stress is applied to it mounted on the printed circuit board.

2. All kinds of reflow soldering must not be applied on the component.

3. Do not clean or wash the component as it is not hermetically sealed.

4. Do not use strong acidity flux, more than 0.2wt% chlorine content, in flow soldering.

5. Conformal coating of the component is not acceptable due to non-sealed construction.

6. Accurate test circuit values are required to measure electrical characteristics. Misrelation may be caused if there is any deviation, especially stray capacitance, from the test circuit in the specification.

7. For safety purposes, connect the output of filters to the IF amplifier through a D.C. blocking capacitor. Avoid applying a direct current to the output of ceramic filters.

# Ceramic Discriminators for Communications Equipment

## kHz Type Ceramic Discriminators

Ceramic discriminator consists of a wide band piezoelectric resonator.  
 It is ideal for mobile communications equipment due to its small size and light weight.  
 Standard line includes products for a wide range of applications, from cordless telecom to cellular telephone. Practically adjustment free at the detection circuit, small size is suitable for downsizing.

### ■ Features

1. Small in size and light weight
2. Adjustment free at detection circuit
3. High sensitivity and stability
4. Wide range of standard products are available for various ICs.
5. Operating temperature range: -20 to +80 (°C)  
 Storage temperature range: -40 to +85 (°C)

# Ceramic Discriminators for Communications Equipment

## MHz Type Ceramic Discriminators

CDSCB10M7 series forms a resonator on a piezoelectric ceramic substrate. In combination with ICs, this type obtains stable demodulation characteristics in a wide bandwidth.

They have 1.0mm max. thickness and small mounting area (4.5x2.0mm).

### ■ Features

1. Compact and high reliability and recommended for automotive applications.
2. Can be combined with various ICs. The IC is determined by the last number in the part number.
3. Stable demodulation characteristics can be obtained without adjustment.
4. Stable temperature characteristics
5. Available lead (Pb) free solder reflow.

Filter is soldered twice within the following temperature conditions.

##### (2) Soldering Iron

Electrode is directly soldered with the tip of soldering iron at  $+350 \pm 5^\circ\text{C}$  for  $3.0 \pm 0.5$  seconds.

#### 2. Wash

##### (1) Cleaning Solvent

CFC alternatives (HCFC Series), Isopropyl Alcohol (IPA), Water (Demineralized Water), Cleaning Water Solution (Cleanthrough-750H, Pine Alpha 100S), Silicon (Technocare FRW)

##### (2) Cleaning Conditions

- Immersion Wash  
2 minutes max. in above solvent at  $+60^\circ\text{C}$  max.
- Shower or Rinse Wash  
2 minutes max. in above solvent at  $+60^\circ\text{C}$  max.

##### (3) Notice

- When components are immersed in solvent, be sure to maintain the temperature of components below the temperature of solvent.
- Please do not use ultrasonic cleaning.
- Total washing time should be within 4 minutes.
- Please ensure the component is thoroughly evaluated in your application circuit.
- Please do not use chlorine, petroleum or alkaline cleaning solvents.
- If you plan to use any other type of solvents, please consult with Murata or Murata representative prior to using.

### ■ CDBKB Series Notice (Handling)

1. The component will be damaged when an excessive stress is applied.
2. If the component is cleaned, please confirm that the reliability has not been degraded.
3. In case of covering filter with over coating, conditions such as material of resin, cure temperature, and so on should be evaluated carefully.
4. Do not use strong acidity flux, more than 0.2wt% chlorine content, in reflow soldering.

5. The product, packed in a moisture-proof bag (dry pack), is sensitive to moisture.

The following treatment is required before applying reflow soldering, to avoid package cracks or reliability degradation caused by thermal stress. When unpacked, store the component in an atmosphere of below 25 degrees C. and below 65%R.H., and solder within 48 hours.

## Ceramic Discriminators Notice

☐ Continued from the preceding page.

### ■ CDBLB Series Notice (Handling)

1. Do not use this product with bend. The component may be damaged if excess mechanical stress is applied to it mounted on the printed circuit board.
2. The component will be damaged when an excessive stress is applied.
3. No type of reflow soldering should be applied to this component.
4. Do not clean or wash the component as it is not hermetically sealed.
5. Do not use strong acidity flux, more than 0.2wt% chlorine content, in flow soldering.
6. In case of covering discriminator with over coating, conditions such as material of resin, cure temperature, and so on should be evaluated carefully.

### ● Soldering and Mounting

#### 1. Standard Reflow Soldering Conditions

##### (1) Reflow

Filter is soldered twice within the following temperature conditions.

##### (2) Soldering Iron

Filter is soldered at  $+300 \pm 5^\circ\text{C}$  for  $3.0 \pm 0.5$  seconds. The soldering iron should not touch the filter while soldering.

##### (3) Condition for Placement Machines

The component is recommended with placement machines that employ optical placement capabilities. The component might be damaged by excessive mechanical force. Please make sure that you have evaluated by using placement machines before going into mass production. Do not use placement machines that utilize mechanical positioning. Please contact Murata for details beforehand.

##### (4) Other

- (a) The component may be damaged if excess mechanical stress is applied to it mounted on the printed circuit board.
- (b) Design layout of components on the PC board to minimize the stress imposed on the warp or flexure of the board.
- (c) After installing components, if solder is excessively applied to the circuit board, mechanical stress will cause destruction resistance characteristics to degrade. To prevent this, be extremely careful in determining shape and dimension before designing the circuit board diagram.
- (d) When the positioning claws and pick-up nozzle are worn, the load is applied to the components while positioning is concentrated on positioning accuracy, etc. Careful checking and maintenance are necessary to prevent unexpected trouble.
- (e) When correcting components with a soldering iron, the tip of the soldering iron should not directly touch the component. Depending on the soldering conditions, the effective area of terminations may be reduced. Solder containing Ag should be used to prevent the electrode erosion.

Continued on the following page. ↗

## Ceramic Discriminators Notice

☐ Continued from the preceding page.

### 2. Wash

Do not clean or wash the component as it is not hermetically sealed.

### 3. Coating

In case of overcoating the component, conditions such as material of resin, cure temperature, and so on should be evaluated well.

## ● Storage and Operating Conditions

### 1. Product Storage Condition

Please store the products in a room where the temperature/humidity is stable, and avoid places where there are large temperature changes. Please store the products under the following conditions:

Temperature: -10 to +40°C

Humidity: 15 to 85% R.H.

### 2. Expiration Date on Storage

Expiration date (shelf life) of the products is six months after delivery under the conditions of a sealed and unopened package. Please use the products within six months after delivery. If you store the products for a long time (more than six months), use carefully because solderability may be degraded due to storage under poor conditions.

Please confirm solderability and characteristics for the products regularly.

### 3. Notice on Product Storage

(1) Please do not store the products in a chemical atmosphere (Acids, Alkali, Bases, Organic gas, Sulfides and so on), because the characteristics may be reduced in quality and may be degraded in solderability due to storage in a chemical atmosphere.

- (2) Please do not put the products directly on the floor without anything under them to avoid damp places and/or dusty places.
- (3) Please do not store the products in places such as a damp heated place or any place exposed to direct sunlight or excessive vibration.
- (4) Please use the products immediately after the package is opened, because the characteristics may be reduced in quality and/or be degraded in solderability due to storage under poor condition.
- (5) Please do not drop the products to avoid cracking of ceramic element.

### 4. Other

Please be sure to consult with our sales representative or engineer whenever the products are to be used in conditions not listed above.

## ● Rating

The component may be damaged if excessive mechanical stress is applied.

## ● Handling

- 1. Accurate test circuit values are required to measure electrical characteristics. Miscorrelation may be caused if there is any deviation, especially stray capacitance, from the test circuit in the specification.
- 2. For safety purposes, avoid applying a direct current between the terminals.

# Ceramic Discriminators Standard Land Pattern Dimensions/Packaging

## Standard Land Pattern Dimensions

CDBKB Series

**⚠Note:**

1. Export Control

<For customers outside Japan>

No Murata products should be used or sold, through any channels, for use in the design, development, production, utilization, maintenance or operation of, or otherwise contribution to (1) any weapons (Weapons of Mass Destruction [nuclear, chemical or biological weapons or missiles] or conventional weapons) or (2) goods or systems specially designed or intended for military end-use or utilization by military end-users.

<For customers in Japan>

For products which are controlled items subject to the "Foreign Exchange and Foreign Trade Law" of Japan, the export license specified by the law is required for export.

2. Please contact our sales representatives or product engineers before using the products in this catalog for the applications listed below, which require especially high reliability for the prevention of defects which might directly damage a third party's life, body or property, or when one of our products is intended for use in applications other than those specified in this catalog.

- |                             |  |
|-----------------------------|--|
| ① Aircraft equipment        | ② Aerospace equipment  |
| ③ Undersea equipment        | ④ Power plant equipment  |
| ⑤ Medical equipment         | ⑥ Transportation equipment (vehicles, trains, ships, etc.)   |
| ⑦ Traffic signal equipment  | ⑧ Disaster prevention / crime prevention equipment   |
| ⑨ Data-processing equipment | ⑩ Application of similar complexity and/or reliability requirements to the applications listed above |

3. Product specifications in this catalog are as of September 2011. They are subject to change or our products in it may be discontinued without advance notice.

Please check with our sales representatives or product engineers before ordering. If there are any questions, please contact our sales representatives or product engineers.

4. Please read rating and ⚠CAUTION (for storage, operating, rating, soldering, mounting and handling) in this catalog to prevent smoking and/or burning, etc.

5. This catalog has only typical specifications because there is no space for detailed specifications. Therefore, please review our product specifications or consult the approval sheet for product specifications before ordering.

6. Please note that unless otherwise specified, we shall assume no responsibility whatsoever for any conflict or dispute that may occur in connection with the effect of our and/or a third party's intellectual property rights and other related rights in consideration of your use of our products and/or information described or contained in our catalogs. In this connection, no representation shall be made to the effect that any third parties are authorized to use the rights mentioned above under licenses without our consent.

7. No ozone depleting substances (ODS) under the Montreal Protocol are used in our manufacturing process.
